

**Question for written answer E-002924/2022  
to the Commission**

Rule 138

**Dan-Ștefan Motreanu** (PPE)

Subject: Desalination of seawater

The desalination of seawater represents an essential, pragmatic and working solution to provide a consistent supply of water, especially in these current times of droughts and water scarcity.

What is the Commission doing to support the development of seawater-desalination technologies and desalination plants in the EU Member States?
