

Question for written answer E-003013/2022

to the Vice-President of the Commission / High Representative of the Union for Foreign Affairs and Security Policy

Rule 138

Özlem Demirel (The Left)

Subject: IT systems for Libyan customs and border control agencies

EUBAM Libya supports the Libyan authorities, inter alia, in connection with their cooperation with neighbouring Tunisia. For example, the customs authority will be provided with an electronic data exchange system for the exchange of customs and tax information. Initial tests are being carried out at the Ras Ajdir border crossing point. Libya could also be supported in connection with the restarting of an automated system for customs data using UNCTAD data.

1. What IT systems are being provided for the Customs authorities through EUBAM Libya and where are they being deployed?
2. What support does the Mission provide for the development or procurement of further systems?
