Subject: Clarification on Regulation (EU) No 1178/2011

Regulation (EU) No 1178/2011 lays down technical requirements and administrative procedures related to civil aviation aircrew. Specifically, in order to renew a single-pilot single-engine class rating, one of the requirements is refresher training that includes a training flight of at least 1 hour.

Can the Commission clarify whether this refresher training must be carried out continuously, in one flight, or if the total of 1 hour may be split over more than one flight?
