

**Question for written answer E-003744/2022
to the Commission**

Rule 138

Dan-Ştefan Motreanu (PPE)

Subject: Farm Sustainability Tool

The Farm Sustainability Tool (FaST) is a valuable instrument for successfully managing the new common agricultural policy (CAP) and providing personalised recommendations to farmers on nutrient management, which is of crucial importance to reduce excess fertilisation and nutrient loss, especially against the backdrop of the growing desire for a strategy on fertilisers. In accordance with Regulation (EU) 2021/2115 on support for CAP strategic plans¹, the FaST for nutrients should be readily available by 2024 at the latest.

However, the official website of the FaST platform² does not seem to have been updated in 2022.

1. Where can the latest information on the FaST, including progress updates, be found?
2. What are the results of the second stage of the project, which was supposed to be completed by the end of May 2022?
