

**Question for written answer E-003876/2022  
to the Commission**

Rule 138

**Dita Charanzová** (Renew)

Subject: Access to health care

Slovak and Czech employees of the Irish company Leasing Europe Limited are complaining about violations of European law by the Irish authorities, specifically Regulation 883/2004 on the coordination of social security systems. Specifically, these workers are being denied access to healthcare in Ireland.

1. Does the Commission intend to monitor the implementation and functioning of the Regulation in Ireland so that the rights of these workers are respected?
2. In the future, how does the Commission intend to ensure that workers are better able to assert their rights to freedom of movement and not be discriminated against by the authorities of another country?
