

**Question for written answer E-000086/2023  
to the Commission**

Rule 138

**David McAllister** (PPE)

Subject: Stepping up IT manufacturing in the EU

It was clear even before the COVID-19 pandemic that the EU needs to determine exactly which technologies have a key role to play in achieving a higher degree of resilience and sovereignty. This includes chips and semiconductor technologies, as well as pharmaceuticals and energy.

What is the Commission doing to boost IT research and manufacturing in the EU?
