to the Commission**  
Rule 138  
**David McAllister** (PPE)

Subject: EU sovereignty in medical supplies

The COVID-19 pandemic highlighted the need for the EU to significantly increase its sovereignty in medical supplies.

1. What is the Commission doing to ensure that in future key medical devices, medical technologies and medicines are manufactured in the EU and that there are sufficient supplies in reserve?
2. How will it help ensure that the necessary manufacturing components can be developed and made autonomously in the EU?
