

**Question for written answer E-001078/2023  
to the Commission**

Rule 138

**Ana Miranda** (Verts/ALE)

Subject: Charging heavy goods vehicles for the use of certain infrastructures

Directive 2011/76/EC of the European Parliament and of the Council amending Directive 1999/62/EC on the charging of heavy goods vehicles for the use of certain infrastructures (OJ L 269, 14.10.2011, p. 1) was adopted on 27 September 2011.

Article 9(2) of the Directive 2011/76/UE states that 'revenues generated from infrastructure and external costs charges ... should be used to benefit the transport sector, and optimise the entire transport system. In particular, revenues ... should be used to make transport more sustainable...'.

In view of the above, and the fact that various Basque Country administrations have failed to apply this criterion, I would like to ask the following questions:

1. Has the Kingdom of Spain transposed Directive 2011/76/EC?
2. If it has not, does the Commission know when it intends to do so?
3. If it has, what is the Commission's assessment of Spain's compliance with Directive 2011/76/EC?
