

**Question for written answer E-001344/2023
to the Commission**

Rule 138

Dominique Riquet (Renew)

Subject: Introducing a rail connectivity index

As part of the European Year of Rail, Decision (EU) 2020/2228 of the European Parliament and of the Council of 23 December 2020 provided that the Commission should, during that year, initiate a feasibility study with a view to introducing a rail connectivity index, with the aim of categorising the level of integration achieved through the use of services on the rail network and showing the potential of rail to compete with other modes of transport.

How much progress has the Commission made on the aforementioned feasibility study and – if applicable – the rail connectivity index?
