

**Question for written answer E-001602/2023
to the Commission**

Rule 138

Jacek Saryusz-Wolski (ECR)

Subject: National recovery and resilience plans

NextGenerationEU is the EU's EUR 800 billion temporary recovery instrument for supporting economic recovery from the COVID-19 pandemic and building a greener, more digital and more resilient future. Most of the budget made available under NextGenerationEU is managed directly by the Commission, meaning that the Commission has primary responsibility for ensuring that the funds are spent properly and used effectively. Given this:

1. For each Member State, how many milestones and targets has the Commission identified as being at high risk of non-fulfilment, and how many of them has the Commission already audited, as declared in response to the European Court of Auditors report? What were the results of these audits?
2. For each Member State, for how many milestones and targets has the Commission found fulfilment to be unsatisfactory?
3. How did the Commission verify that it had access to the data specified in Article 22(2)(d) of Regulation (EU) 2021/241 in each Member State? Did the Commission conduct a data quality check for these systems, and if so, in which Member States?
