Subject: Pilot project on border surveillance and control in Romania

Romania is running a pilot project on border surveillance and control with a view to bringing it in line with Frontex standards. Serbia is also participating.

1. What Frontex equipment (including mobile equipment) and personnel are stationed at the border between Romania and Serbia and what tasks are they engaged in?
2. To what extent are Romanian national information systems also to be linked or at least adapted to those of Frontex, and which systems are to be involved?
3. To what extent can the EU Asylum Agency also register refugees in Romania, when did it start doing so and how much progress has it already made?
