

**Question for written answer E-001901/2023/rev.1
to the Commission**

Rule 138

Özlem Demirel (The Left)

Subject: European Defence Fund: Convoy Operations with Manned-unManned Systems
(COMMANDS)

The COMMANDS project funded by the European Defence Fund will develop capabilities for agile, intelligent and cooperative manned and unmanned land systems.

1. How will the system face problems caused by degraded or denied satellite signals, or cope with poor communications scenarios?
2. What system is in place to guarantee the possibility of disabling the vehicle in situations where there is an absence of communication when the unmanned option is activated?
