E-002123/2023
Answer given by Mr Hahn
on behalf of the European Commission
(18.9.2023)

The additional amounts proposed by the Commission for the Mid-term revision of the Multiannual Financial Framework¹ (MFF) over the period 2024-2027 would imply yearly additional payments of EUR 16.45 billion. This would represent not even 0.09% of EU GNI in the year 2024, which cannot be expected to have a significant impact on inflation. Furthermore, it should be considered that most of the amounts proposed in the MFF revision would be implemented in Ukraine (indicatively EUR 33 billion in loans and EUR 17 billion in grants).
