

**Question for written answer E-002123/2023  
to the Commission**

Rule 138

**Moritz Körner** (Renew)

Subject: The impact of the EU budget on inflation

High inflation is currently harming millions of households and businesses throughout the EU, and public spending has an impact on inflation. On 20 June 2023, the Commission proposed a revision of the multiannual financial framework (MFF), which would see an additional EUR 65.8 billion allocated to its political priorities. Has the Commission assessed how the proposed revision of the MFF will affect inflation in the EU, and if so, what were the findings?
