to the Commission**

Rule 138

**Ondřej Kovařík** (Renew)

Subject: Assessing the impact of tariffs on the EU's automotive industry in the face of non-compliance with the EU's rules of origin for electric vehicles

In the face of non-compliance with the EU's rules of origin for electric vehicles:

1. Has the Commission assessed the impact of tariffs on the EU's automotive industry in the event that vehicle exporters are not able to meet the rules of origin for electric vehicles being exported to the UK?
2. How would a tariff of 10 % impact the ability of our vehicle exporters to compete on the UK market, particularly now that cheaper electric vehicles are being imported into the UK from China?
