

**Question for written answer E-002288/2023  
to the Commission**

Rule 138

**Moritz Körner** (Renew)

Subject: Agricultural subsidies

EU farmers receive various types of subsidies from the EU and national budgets, including interest rate subsidies, investment support, fuel allowances, compensatory allowances, grants for less favoured areas, support for agri-environmental measures, etc.

On average, at EU level and in the individual Member States, what proportion of farmers' incomes do these subsidies currently make up?

Is the Commission able to provide this information?

If not, why not?
