

**Question for written answer E-002466/2023
to the Commission**

Rule 138

Tomasz Frankowski (PPE)

Subject: Draft regulation of the Minister for Infrastructure on approving the installation of an additional gas supply system for vehicles

In connection with the submission to the Commission of the Minister for Infrastructure's draft regulation on approving the installation of an additional gas supply system for vehicles, I should like to put the following questions to the Commission:

1. In its assessment of the draft regulation, did the Commission take account of the social dimension of the project, and did it look at the issue of the equality of EU entities (the legislator imposed additional costs and obligations on Polish entities that were not included in the directive, meaning that they are less competitive than those in other EU countries)? This also applies to the new duties assigned to Poland's transport technical supervision service.
2. In its assessment of the regulation and its potentially negative effects on Polish companies, did the Commission take into account the guidelines set out in Article 40(2) of the Act of 14 April 2023 on vehicle approval systems, which form the basis for the above-mentioned regulation?
