

**Question for written answer E-002557/2023
to the Commission**

Rule 138

Harald Vilimsky (ID), Georg Mayer (ID)

Subject: Carbon footprint of fighter jets for Ukraine

Not until late August 2023 did High Representative / Vice-President of the Commission Josep Borrell stress that he welcomed the decision by Denmark and the Netherlands to deliver fighter jets to Ukraine.

1. What is the carbon footprint of a fighter jet when figures for production, delivery and deployment are combined?
2. To what extent is the delivery of fighter jets compatible with the objectives of the Commission's Green Deal?
3. How much carbon has already been emitted as a result of arms deliveries or other support provided by the EU to Ukraine in the war against Russia?
