

Question for written answer E-002776/2023
to the Commission
Rule 138
Olivier Chastel (Renew)

Subject: Pro-bike policy

It is great to see that bikes are becoming a more popular mode of transport in many Member States.

1. Right across Europe, we are seeing cycle highways being built. What action has the Commission taken to support the development of this infrastructure? Can it say exactly what initiatives it has pursued in each Member State?
2. More generally, what is it doing to promote soft mobility? And how much has been earmarked therefor, both overall and broken down by Member State?
