Subject: Including the Nice-Ventimiglia-Cuneo railway line in the TEN-T comprehensive network

The road between Cuneo and Ventimiglia, via the Colle di Tenda pass, is currently closed. No date has so far been set for the full reopening of this section, causing significant inconvenience to the local population and harming the economy of the regions involved.

Mobility is a key factor for the integration and development of European regions and in particular border areas such as that between Italy and France, and the Italian Government has expressed its willingness to include the Nice-Ventimiglia-Cuneo railway line in the TEN-T comprehensive network.<sup>1</sup>

What is therefore the Commission's position on the Italian Government's proposal to include the Nice-Ventimiglia-Cuneo line in the TEN-T comprehensive network?
