Subject: Concerns about the European Insurance and Occupational Pensions Authority report on Euroins Romania

In March 2023, the European Insurance and Occupational Pensions Authority (EIOPA) produced a report on the insurance company Euroins România Asigurare-Reasigurare S.A. (Euroins România) revealing it to have a capital shortfall of between EUR 550 million and EUR 581 million. Euroins was not invited to participate in the preparation of the report. An actuarial report commissioned by the European Bank for Reconstruction and Development (EBRD) concluded that, from a quantitative perspective, Euroins was solvent and had no capital gap, thus questioning the accuracy of the EIOPA's analysis. The manner in which the EIOPA has dealt with the Euroins Romania case raises serious questions about the agency.

Will the Commission undertake to carry out a rigorous review of the EIOPA report, the manner in which it was prepared, and the accuracy of its conclusions, and make the findings of its review available to Parliament?
