

**Question for written answer E-003028/2023
to the Commission**

Rule 138

Miguel Urbán Crespo (The Left)

Subject: Restoring the monument to the Assumption in Jerez de la Frontera

On 8 April 2020, the order that marked out the area around the monument to the Assumption in Jerez de la Frontera for complete restoration was published in the Official Journal of Andalusia as part of Integrated Territorial Investment for 2014 – 2020 for the province of Cádiz. This investment is part of the Operational Programme ERDF. The investment consists of a sum of EUR 5 960 293.65 and the City Council of Jerez is collaborating with the programme. The project was due to be completed before 31 December 2023, but the reality being communicated by the locals affected by the restoration, who were tricked into supporting the construction work, is that the restoration being undertaken is far from being finished in the time and manner stipulated.

In view of this:

1. What liability would the Regional Government of Andalusia and the City Council of Jerez as collaborators incur in the event that the restoration is not completed in the time and manner required?
2. Could the Regional Government of Andalusia ask for an extension of the deadline for completing the work?
