to the Commission**

Rule 138

**Gianantonio Da Re (ID)**

Subject: Dissemination of illegal content and disinformation on Tik Tok

On 12 October just passed, the Internal Market Commissioner, Thierry Breton, sent a letter to Tik Tok CEO, Shou Zi Chew, urging him to put a stop to the dissemination of illegal content and disinformation on his social media platform. It would appear that such content has been circulating on social networks since Hamas' terrorist attacks against Israel. The Internal Market Commissioner also stressed that given how popular Tik Tok is among children and teenagers, the platform needs to pay special attention to content moderation.

In view of this, can the Commission state what steps it plans to take to prevent the dissemination of terrorist propaganda on Tik Tok and other social media?
