

**Question for written answer E-003505/2023
to the Commission**
Rule 138
Moritz Körner (Renew)

Subject: EU support and funding

The US government takes opinion polls among Palestinians to measure Palestinian support for the US. It has happened that when the poll has found that Palestinians had very low support for the United States, it consequently reduced its financial support for the Palestinians, given that the investment had not achieved a positive outcome.

The Commission is asked to answer the following questions separately and directly:

1. Has the Commission ever run a similar poll?
2. Does the Commission know how high Palestinians' support for the EU is?
3. Is there a threshold of support for the EU under which the Commission would ever propose reducing financial support for the Palestinians?
