

**Question for written answer E-003670/2023  
to the Commission**

Rule 138

**Isabel Benjumea Benjumea (PPE)**

**Subject:** Data on the implementation of the Recovery and Resilience Facility in Spain

On 31 October 2023, the Spanish General Comptroller of the State Administration (IGAE) published the 2023 General State Budget implementation data. However, in the chapter on the Recovery and Resilience Facility, the final implementation data, i.e. the information on the funds that have already reached final recipients and thus entered the real economy, remains unpublished. This is despite the constant calls from regional and municipal governments, opposition parties, independent bodies, economic institutions, civil society and the European Parliament itself.

In light of this:

1. Has the Spanish Government provided the Commission with the final implementation data for the Recovery and Resilience Facility?
2. Beyond the funds committed and the payments made, should the Spanish Government not publish final implementation data in the interests of transparency and a real understanding of the impact and management of these funds in Spain?
