Subject: Transparency concerning the Commission's analysis of the conformity of France's
measures transposing Directive (EU) 2019/944

In the light of the Commission's recent conformity analysis of France's measures transposing
Directive (EU) 2019/944, does the Commission take the view that the country's arrangements for the
distribution and supply of electricity at regulated tariffs in France conform with Directive (EU)
2019/944?

In particular:

1. Are the French transposition measures concerning price setting for electricity supplies in line with
EU law?
2. Does Article 30 of Directive (EU) 2019/944 permit Member States to appoint an electricity
distribution system operator without setting a time frame for its tasks?
