

**Question for written answer E-000004/2024
to the Commission**

Rule 138

Gianantonio Da Re (ID)

Subject: Measures to counteract the progressive ageing of the European population

According to the Commission's report of 11 October 2023 on demographic change, the European population is undergoing a transformation owing to various factors, including falling fertility rates and emigration.

The progressive ageing of Europe's population is, among other consequences, apparently cutting growth and economic competitiveness while putting the social security system under severe pressure.

In the light of the above:

Does the Commission intend to take action to counteract and prevent the main causes of the aging of Europe's population?
