

**Question for written answer E-000152/2024
to the Commission**
Rule 138
Loucas Furlas (PPE)

Subject: The right to repair

Throwing away consumer goods and products instead of repairing and reusing them has a huge impact on the environment as it generates 35 million tonnes of waste every year in the EU. The right to repair is considered an essential step in the EU's strategy for the transition towards a circular economy by 2050 in the context of the European Green Deal, with the ultimate goal of making the EU climate neutral by 2050.

What is the Commission doing to incentivise EU citizens to repair and reuse consumer goods with a view to reducing waste?
