

**Question for written answer E-000214/2024
to the Commission**

Rule 138

Stanislav Polčák (PPE)

Subject: Guidelines for territorial cooperation

There is no doubt that involving local and regional authorities from the outset in the preparation and implementation of projects is desirable, meaningful and in keeping with the spirit of the partnership principle. The issue of territorial cooperation highlights the need for guidelines to facilitate cooperation between those authorities in neighbouring countries. This month, Parliament called on the Commission to draft such guidelines. How will the Commission respond to this call?
