Amendments to a draft act

Amendments by Parliament set out in two columns

Deletions are indicated in bold italics in the left-hand column. Replacements are indicated in bold italics in both columns. New text is indicated in bold italics in the right-hand column.

The first and second lines of the header of each amendment identify the relevant part of the draft act under consideration. If an amendment pertains to an existing act that the draft act is seeking to amend, the amendment heading includes a third line identifying the existing act and a fourth line identifying the provision in that act that Parliament wishes to amend.

Amendments by Parliament in the form of a consolidated text

New text is highlighted in bold italics. Deletions are indicated using either the ▌ symbol or strikeout. Replacements are indicated by highlighting the new text in bold italics and by deleting or striking out the text that has been replaced.

By way of exception, purely technical changes made by the drafting departments in preparing the final text are not highlighted.

(10) Cohesion policy funds are also synchronised with the European Semester process. As the long-term investment policy of the EU budget, cohesion policy investments and reforms should also be duly taken into account in the drawing of the national medium-term fiscal-structural plans. Each Member State should also explain how its national medium-term fiscal-structural plan will ensure consistency with the expenditure on EU programmes fully matched by EU funds revenue and the relevant national co-financing.

\textbf{Amendment}

(10) Cohesion policy funds are also synchronised with the European Semester process. As the long-term investment policy of the EU budget, cohesion policy investments and reforms should also be duly taken into account in the drawing of the national medium-term fiscal-structural plans. Each Member State should also explain how its national medium-term fiscal-structural plan will ensure consistency and, where appropriate, complementarity with the expenditure on EU programmes fully matched by EU funds revenue and the relevant national co-financing.

\textbf{Amendment 6}

\textbf{Proposal for a regulation}

\textbf{Recital 11}
(11) The presentation of the national medium-term fiscal-structural plan should be preceded by a technical dialogue with the Commission to ensure compliance with the provisions of this Regulation. On the basis of a recommendation from the Commission, the Council should set the net expenditure path and endorse the reform and investment commitments, including those taken for the possible extension of the adjustment period, as appropriate.

(12) In order to simplify the Union fiscal framework and increase transparency, a single operational indicator anchored in debt sustainability should serve as a basis for setting the fiscal path and carrying out annual fiscal surveillance for each Member State. That single operational indicator should be based on nationally financed net primary expenditure, that is to say expenditure net of discretionary revenue measures and excluding interest expenditure as well as cyclical unemployment expenditure and expenditure on Union programmes fully matched by revenue from Union funds.

Amendment

(11) The presentation of the national medium-term fiscal-structural plan should be preceded by a technical dialogue with the Commission to ensure compliance with the provisions of this Regulation. The technical dialogue should be properly documented for the purpose of transparency and accountability towards the European Parliament. On the basis of a recommendation from the Commission accompanied by an evaluation of the European Advisory Fiscal Board (EFB) and the national independent fiscal institution of the Member State concerned, the Council should set the net expenditure path and endorse the reform and investment commitments, including those taken for the possible extension of the adjustment period, as appropriate.

(12) In order to simplify the Union fiscal framework and increase transparency, a single operational indicator anchored in debt sustainability should serve as a basis for setting the fiscal path and carrying out annual fiscal surveillance for each Member State. That single operational indicator should be based on nationally financed net primary expenditure, that is to say government expenditure net of interest expenditure, discretionary revenue measures, expenditure on programmes of the Union fully matched by Union funds revenue, national expenditure on co-financing of programmes funded by the Union.
This indicator allows for macro-economic stabilisation as it is not affected by the operation of automatic stabilisers, including revenue and expenditure fluctuations outside the direct control of the government.

Union capped with a limit of 0.25% of GDP, cyclical elements of unemployment benefit expenditure, and costs related to the borrowing of funds for the loans related to the national Recovery and Resilience Facility Plans. This indicator allows for macro-economic stabilisation as it is not affected by the operation of automatic stabilisers, including revenue and expenditure fluctuations outside the direct control of the government.

Amendment 8
Proposal for a regulation
Recital 13

Text proposed by the Commission

(13) To provide guidance to the Member States in the drafting of their medium-term fiscal-structural plan, the Commission should put forward a technical trajectory based on the minimum fiscal adjustment that brings the debt trajectory of the Member State on a plausibly downward path or maintains debt at a prudent level. It should also ensure that the public debt ratio at the end of the planning horizon declines below its level in the year before the start of the technical trajectory. The sustainability of that debt reduction should result from appropriate fiscal policies.

Amendment

(13) To initiate the drafting of its national medium-term fiscal-structural plan, each Member State with a public debt above the 60% of GDP reference value or a government deficit above the 3% of GDP reference value should put forward a proposal for a reference trajectory to the Commission. The trajectory should be based on the minimum fiscal adjustment that brings the debt trajectory of the Member State on a plausibly downward path leading to sustainable debt reduction or maintains debt at a prudent level. It should also ensure that the public debt ratio stabilises over the adjustment period and is reduced by at least [x] p.p of debt to GDP on average over the projection period (i.e. the adjustment period plus 10 years). The sustainability of that debt reduction should result from appropriate fiscal policies.

Amendment

(15) In order to assess whether further adjustments are required towards the end
of the four-year implementation period of the national medium-term fiscal-structural plan, the Commission should reassess the situation and put forward a new technical trajectory if the public debt of the Member State is still above 60% of GDP reference value or its government deficit is higher than 3% of GDP reference value.

Recital 16

Text proposed by the Commission

(16) Each national medium-term fiscal-structural plan should mention its status in the context of national procedures, notably whether the plan was presented to the national parliament and whether there has been parliamentary approval of the plan. The national medium-term fiscal-structural plan should also indicate whether the national parliament had the opportunity to discuss the Council recommendation on the previous plan and, if relevant, any other Council recommendation or decision, or any Commission warning.

Amendment

(16) Prior to the submission of the national medium-term fiscal-structural plan, each Member State should consult relevant stakeholders and its national parliament and annex the result of that consultation to the plan. Each national medium-term fiscal-structural plan should also mention its status in the context of national procedures, notably whether there has been parliamentary approval of the plan and whether, if applicable, the national parliament had the opportunity to discuss the Council recommendation on the previous plan and any other Council recommendation or decision, or any Commission warning.

(21) In order to ensure the implementation of the medium-term fiscal-structural plans, the Commission and the Council should monitor the reform and investment commitments made in these plans under the European Semester, based on the annual progress reports submitted by the Member States, and in accordance with the provisions of Articles 121 and 148 TFEU. To that effect, they should engage in a European Semester dialogue with the European Parliament.

Amendment

(21) In order to ensure the implementation of the medium-term fiscal-structural plans, the Commission and the Council should monitor the reform and investment commitments made in these plans under the European Semester, based on the annual progress reports submitted by the Member States, and in accordance with the provisions of Articles 121 and 148 TFEU. To that effect, they should engage in a European Semester dialogue with the European Parliament and a medium-term structural-fiscal plan dialogue with the competent committee of the European Parliament. The Commission should take into account elements arising from the views expressed through these dialogues.

Amendment 17

Proposal for a regulation
Recital 21 a (new)

Text proposed by the Commission

(21a) The European Parliament should be duly involved in a regular and structured way in the European Semester. The Council and the Commission should
regularly report to the European Parliament on the application of this Regulation and include in their reports the results of the multilateral surveillance carried out pursuant to this Regulation. In order to ensure transparency and accountability in the application of this Regulation, the Commission should transmit, subject to appropriate confidentiality arrangements if they are necessary, relevant documents and information simultaneously and on equal terms to the European Parliament and to the Council, such as the medium-term fiscal-structural plans submitted by Member States and the proposed net expenditure path, the debt sustainability assessments and an overview of the Commission’s preliminary findings concerning the progress in the implementation of the plans. A dedicated scoreboard should be established by way of a delegated act to display the progress of the implementation of the medium-term fiscal-structural plans of the Member States. The scoreboard should be operational by June 2024 and should be updated by the Commission twice a year.

(23) With a view to ensuring an equitable and transparent process, the reform and investment commitments should be assessed using a common Union framework. During the lifetime of the Recovery and Resilience Facility, commitments in the national Recovery and Resilience Plans can be considered in the assessment of the request for an extension

Amendment

(23) With a view to ensuring an equitable and transparent process, the reform and investment commitments should be assessed using a common Union framework. During the lifetime of the Recovery and Resilience Facility, commitments in the national Recovery and Resilience Plans should be consistent with the set of reforms and investments for an
of the adjustment period, where applicable. The set of reforms and investments underpinning an extension of the fiscal adjustment path period should be commensurate with the degree of public debt challenges as established in the most recent update of the Debt Sustainability Monitor and challenges to medium-term growth in the Member State. For Member States where public debt challenges are linked to significant challenges to medium-term growth, the set of reforms and investments is expected to also address bottlenecks to medium-term growth.

Amendment 19

Recital 24

Text proposed by the Commission

(24) The set of reform and investment commitments put forward in the national medium-term fiscal-structural plans should be aligned with common priorities of the Union. That set of reform and investment commitments should also be consistent with the implementation of the national strategies put forward by the Member State concerned to address the relevant Union priorities. Where relevant, during the lifetime of the Recovery and Resilience Facility, cross-references to the Recovery and Resilience Plans should be made to ensure policy consistency. Amendment

(24) The set of reform and investment commitments put forward in the national medium-term fiscal-structural plans should be aligned with common priorities of the Union. That set of reform and investment commitments should also be consistent with the implementation of the national strategies put forward by the Member State concerned to address the relevant Union priorities, and with the Recovery and Resilience Plans, during the lifetime of the Recovery and Resilience Facility, and with any Union investment instruments that address the common priorities of the Union or serve the same purpose as the Recovery and Resilience Facility.

(26) To inform enforcement actions, in particular a report under Article 126(3) TFEU, the Commission should set up a control account for each Member State to keep track of annual deviations of the net expenditure observed in the Member State from the net expenditure path set by the Council, summing those deviations over time.

Amendment

(26) To inform enforcement actions, in particular a report under Article 126(3) TFEU, the Commission should set up a control account for each Member State to keep track of annual deviations of the net expenditure observed in the Member State from the net expenditure path set by the Council, summing those deviations over time. A Member state will be deemed not to be in compliance of its net expenditure path where the cumulated balance of the control account during the adjustment period is higher than [X% of GDP] in the years of positive GDP growth.

(31) There should also be a country-specific escape clause to allow a deviation from the net expenditure path provided that it does not endanger fiscal sustainability in the medium term in the case of exceptional circumstances, such as unpredictable exogenous events that could not have been prevented and that require counter-cyclical fiscal measures, outside the control of the Member State which have a major impact on the public finances of the Member State. Such major impact should result in an overall size of the shock that exceeds a ‘normal’ range: for example costs of natural disasters should be factored in in budgetary planning within a certain range. The triggering and extension of general and country-specific escape clauses are subject to a Council recommendation.

(31) There should also be a country-specific escape clause to allow a deviation from the net expenditure path provided that it does not endanger fiscal sustainability in the medium term in the case of exceptional circumstances, such as unpredictable exogenous events that could not have been prevented and that require counter-cyclical fiscal measures, outside the control of the Member State which have a major impact on the public finances of the Member State. Such major impact should result in an overall size of the shock that exceeds a ‘normal’ range. The assessment of whether fiscal sustainability is not endangered for the application of both the general and country-specific escape clauses, should be based on a quantitative analysis by the Commission. The triggering and extension of general and country-specific escape clauses are subject to a Council recommendation.

Proposal for a regulation
Recital 33

Text proposed by the Commission

(33) In order to ensure effective implementation and appropriate monitoring of this Regulation, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of: the information to be provided by Member States in their medium-term fiscal-structural plans, the information to be provided by Member States in their annual progress reports, the functioning of the control account, the methodology to assess plausibility by the Commission,

Amendment

(33) In order to ensure effective implementation and appropriate monitoring of this Regulation, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of: the methodology for debt sustainability analysis, the methodology to assess plausibility that the projected public debt ratio is on a downward path leading to sustainable debt reduction or remains at a prudent level, and the implementation of a scoreboard. It is of particular
drawing up of the list of common Union priorities and the assessment framework for the set of reform and investment commitments underpinning an extension of the fiscal adjustment period. It is of particular importance that the Commission carries out appropriate consultations during its preparatory work, including at expert level, and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making\textsuperscript{29}. In particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council receive all documents at the same time as Member States' experts, and their experts systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts.

Recital 33 a (new)

\textit{Text proposed by the Commission}

(33a) A methodology for debt sustainability analysis should be adopted by means of a delegated act no later than 12 months after the entry into force of this Regulation. For that purpose, the Commission should identify factors that are relevant to assessing the sustainability of debt. For the first year in which the Member States have to submit their medium-term fiscal-structural plans, the basis for the underlying medium-term public debt projection framework should be the 2022 Debt Sustainability Monitor.

Amendment 46

Proposal for a regulation
Article 7 – paragraph 1 a (new)

Text proposed by the Commission

1a. By [1 March] of the year referred to in paragraph 1, each Member State shall submit its proposal for a reference trajectory to the Commission. That proposal shall take into account the information referred to in paragraph 1. Following the submission of a proposal, the Commission and the Member State shall hold a dialogue with the objective of ensuring that the proposed reference trajectory complies with Articles 5 and 6. In the event of disagreement between the Commission and the Member State following that dialogue, the reference trajectory put forward by the Commission shall apply.

The Commission shall provide the reference trajectories to the Council and the European Parliament, including the proposed trajectories put forward by the Member States, data, assumptions and calculations underlying the trajectories in a way that allows for replication.

Criteria for setting the technical trajectory for Member States having a public debt above 60% of GDP reference value or government deficit above 3% of GDP reference value

For Member States having public debt above the 60% of GDP reference value or government deficit above the 3% of GDP reference value, the technical trajectory shall ensure that:

(a) by the end of the adjustment period, at the latest, the 10-year debt trajectory in the absence of further budgetary measures is on a plausibly downward path or stays at prudent levels;
(b) the government deficit is brought and maintained below the 3% of GDP reference value in the absence of further budgetary measures over the same 10-year period;

(c) for the years that the Member State concerned is expected to have a deficit above the 3% of GDP reference value, and the excess is not close and temporary, the technical trajectory is also consistent with the benchmark referred to under Article 3 of Council Regulation (EC) No 1467/97 on speeding up and clarifying the implementation of the excessive deficit procedure as amended by Regulation [X];

(d) the adjustment effort is not postponed towards the final years of the adjustment period, that is to say the fiscal adjustment effort over the period of the national medium-term fiscal-structural plan is at least proportional to the total effort over the entire adjustment period;

(e) the public debt ratio at the end of the planning horizon is below the public debt ratio in the year before the start of the technical trajectory; and

(f) national net expenditure growth remains below medium-term output growth, on average, as a rule over the horizon of the plan.
