AMENDMENTS

326 - 593

Draft report
Carlo Calenda
(PE650.700v01-00)

A New Industrial Strategy for Europe
(2020/2076(INI))

Amendment 326

Christophe Grudler, Dominique Riquet, Ivars Ijabs, Mauri Pekkarinen, Valérie Hayer, Susana Solís Pérez, Dragoş Pîslaru, Pierre Karleskind, Bernard Guetta, Fabienne Keller, Sylvie Brunet, Katalin Cseh, Izaskun Bilbao Barandica, Nicola Danti, Stéphane Bijoux, Andrus Ansip

Motion for a resolution

Paragraph 10

Motion for a resolution

10. Highlights the need to support a sustainable and fair recovery beyond the COVID-19 crisis in order to enhance growth in the EU by increasing investment in the digital and green transitions; asks the Commission to support an ambitious Recovery Fund that is within the framework of a stronger MFF and ***is integrated in the own resource decision, and*** to pursue fiscal policy coordination to strengthen the European fiscal framework; is of the opinion that, after the peak of the pandemic, the Fund should become a permanent Reconstruction Fund to foster the digital and green industrial transitions;

Amendment

10. Highlights the need to support a sustainable and fair recovery beyond the COVID-19 crisis in order to enhance growth ***and autonomy*** in the EU by increasing investment in the digital and green transitions; asks the Commission to support an ambitious Recovery Fund that is within the framework of a stronger MFF and to pursue fiscal policy coordination to strengthen the European fiscal framework; ***in this regard, highlights the position of the European Parliament on the reform of the EU own resources system, including the introduction of new resources that are better aligned with and incentivise progress in major EU policy priorities such as a digital services taxation, a financial transaction tax, proceeds generated by the establishment of a common consolidated corporate tax base, income from the emissions trading scheme, a plastics contribution and a carbon border adjustment mechanism;*** is of the opinion that, after the peak of the pandemic, the Fund should become a permanent Reconstruction Fund to foster the digital and green industrial transitions;

Motion for a resolution

Paragraph 11 a (new)

Motion for a resolution

Amendment

11a. Highlights that the automotive sector has been greatly affected by COVID-19 crisis, forcing industries and workers to adapt quickly to the changes in supply and new health requirements, in addition to the transformation process they were already undergoing before the pandemic. The transition to smart and clean mobility is essential as we evolve towards a climate-neutral, digital and more resilient economy. It is also an opportunity to generate green growth and clean jobs, which is particularly important in times of crisis, based on the global competitive advantage of European industry in vehicle technologies; calls on the Commission to set priorities related to research and innovation, digitisation and support for start-ups, micro, small and medium enterprises, including the automotive sector;

Or. en

Amendment 347

Margarita de la Pisa Carrión

Paragraph 12

Motion for a resolution

12. Considers that **once** the emergency phase **is over**, the Union should **embark on a** second phase of its industrial strategy: **ensuring the competitiveness, resilience and sustainability of its industries** in the long term;

Amendment

12. Considers that **in parallel to** the emergency phase, the Union should **prepare and anticipate the** second phase of its industrial strategy: **towards a greener, innovative, inclusive and sovereign Europe** in the long term;

Or. en

Amendment 367

Michael Bloss

on behalf of the Greens/EFA Group

Motion for a resolution
Paragraph 12 a (new)

Motion for a resolution

Amendment

12a. Recognises that various industrial

sectors have a significant need for investment in the 2020s, since many of their plants have reached a life span of 50 to 70 years of age; acknowledges that the impact of the Covid crisis is likely to increase these reinvestment needs given that some of the old plants shut down due to a decline in production; emphasises that these reinvestments must be compatible with the net-zero GHG emission goal, in particular since such large scale investments are taken only every 30-40 years, and otherwise risk to become stranded assets and lock-us in fossil based and environmentally harmful technologies and infrastructure, while taking away precious resources from the most needed investment streams, such as in energy and resource savings, circular economy measures and renewable energy production to sustain electrification of industrial processes;

Or. en

Amendment 368

Christophe Grudler, Susana Solís Pérez, Dominique Riquet, Ivars Ijabs, Mauri Pekkarinen, Valérie Hayer, Izaskun Bilbao Barandica, Nicola Danti, Fredrick Federley, Fabienne Keller, Sylvie Brunet, Andrus Ansip

Motion for a resolution Paragraph 12 a (new)

Motion for a resolution

Amendment

12a. Considers that the Union requires a green industrial strategy aligned with the Paris Agreement, that places the objectives of the Green Deal (the fight against climate change and the protection of environmental health and biodiversity) at the centre of European economic policy; the strategy must therefore accelerate the transformation of our industry towards a carbon-neutral industry and fill the gap in climate investment in Europe, which is necessary

for the transition to climate neutrality;

Or. en

Amendment 369

Tom Berendsen

on behalf of the EPP Group

Ivan Štefanec, Angelika Niebler, Christian Ehler, Pascal Arimont, Antonio Tajani, Massimiliano Salini, Sven Schulze, Pilar del Castillo Vera, Sara Skyttedal, Henna Virkkunen, Edina Tóth, Markus Pieper, Maria da Graça Carvalho, Eva Maydell, Tomas Tobé, François-Xavier Bellamy, Maria Spyraki, Jerzy Buzek, Seán Kelly, Pernille Weiss

Amendment 475
Carlo Calenda

Motion for a resolution
Paragraph 15 b (new)

Motion for a resolution

Amendment

15b. *Underlines the need to support integrated and harmonised incentives for both circularity and clean primary production and to consider new targets and plans for medium and long term transformation in line with the EU's 2030, 2040 and 2050 climate and environmental objectives to facilitate the transition of industrial sectors while also taking into account regional specificities;*

Or. en

Amendment 476
Ignazio Corrao, Eleonora Evi

Motion for a resolution
Paragraph 15 b (new)

Motion for a resolution

Amendment

15b. *Calls on the Commission to ensure that industries with high carbon leakage do not benefit from EU subsidies, and for better use to be made of the EIB, as the Union's 'Climate Bank', to enhance financing to the public and private sectors according to the sustainable taxonomy;*

Or. en

Amendment 477
Ignazio Corrao, Eleonora Evi

Motion for a resolution
Paragraph 15 c (new)

Motion for a resolution

Amendment

15c. *Calls on the Commission to explore a range of mechanisms to protect EU manufacturers and jobs from unfair international competition and to encourage trade partners to adopt ambitious climate and environmental legislation; in this regard, welcome the intention of the Commission to implementing a WTO compatible Border Carbon adjustment tax and calls contextually on the Commission to assess how an Emissions Added Tax (EAT) applied to final products, monetising on the VAT the CO₂ emissions of their manufacturing process, could be developed;*

Or. en

Amendment 478
Jens Geier, Maria-Manuel Leitão-Marques, Łukasz Kohut, Nicolás González Casares,

Lina Gálvez Muñoz, Robert Hajšel

**Motion for a resolution
Paragraph 15 c (new)**

Motion for a resolution

Amendment

15c. Underlines that decarbonising industrial production processes needs to be a viable business-case for the industry, notes with concern that many already available clean technologies and support infrastructures, including energy, are still not competitive with carbon-intensive technologies and energy; encourages the Commission to assess and consider new ways of tackling that problem such as carbon contracts for difference, industrial energy prices and quotas of content of clean and recycled base materials in end-products;

Or. en

**Amendment 479
Michael Bloss**
on behalf of the Greens/EFA Group

**Motion for a resolution
Paragraph 15 c (new)**

Motion for a resolution

Amendment

15c. Calls on the Council to increase climate related spending from the EU budget to at least 50% and to introduce legally binding safeguards in line with the do no harm principle into the MFF Regulation, in order to stop the financing of polluting sectors and live up to the EU's legal obligation under the Paris Agreement to align financial flows with its objectives and phase out fossil fuel subsidies;

Amendment 480

Jens Geier, Maria-Manuel Leitão-Marques, Łukasz Kohut, Nicolás González Casares, Lina Gálvez Muñoz, Robert Hajšel, Dan Nica

Motion for a resolution

Paragraph 15 d (new)

Motion for a resolution

Amendment

15d. Emphasises the particular importance of the transition towards climate-neutrality for energy-intensive industries; calls on the Commission to develop a strategy for their decarbonisation as well as targeted support measures to prevent job losses, carbon-leakage and industrial closures; welcomes in this respect the announced Strategies for Clean Steel and sustainable Chemicals;

Or. en

Amendment 481

Michael Bloss

on behalf of the Greens/EFA Group

Motion for a resolution

Paragraph 15 d (new)

Motion for a resolution

Amendment

15d. Demands to make better use of the EIB, as the Union's "Climate Bank", to enhance sustainable financing by applying the sustainable taxonomy to all public and private sectors; calls further on the Commission for a swift delivery of a "brown taxonomy" - a classification of investments contradictory to environmental goals, in accordance with the Taxonomy Regulation;

Or. en

Amendment 482

Jens Geier, Maria-Manuel Leitão-Marques, Łukasz Kohut, Robert Hajšel, Dan Nica

Motion for a resolution

Paragraph 15 e (new)

Motion for a resolution

Amendment

15e. Underlines the importance of state-aid to support the industry during the decarbonisation and digitalisation; welcomes in this respect the revision of state-aid guidelines announced for 2021; is of the opinion that, for the revision, the Commission should bear in mind distortions on global level and that the EU needs to remain competitive with states that ensure their competitiveness through high amounts of state-financing; encourages the Commission to clarify in the revision the conditions for IPCEIs, including for industry and energy transition projects in new and existing plants;

Or. en

Amendment 483

Michael Bloss

on behalf of the Greens/EFA Group

Motion for a resolution

Paragraph 15 e (new)

Motion for a resolution

Amendment

15e. Believes that all existing measures on carbon leakage should be replaced by policies and instruments that internalise all costs linked to GHG emissions; welcomes, in this regard, the Commission's commitment to set up a WTO compatible Border Carbon Adjustments mechanism as part of a broader strategy for a competitive

decarbonised EU economy that upholds the EU's climate ambition while securing a level playing field in international trade; stresses that this should be an alternative to, not complement existing measures under the ETS;

Or. en

Amendment 484

Michael Bloss

on behalf of the Greens/EFA Group

Ignazio Corrao, Eleonora Evi, Marc Botenga

Motion for a resolution

Paragraph 15 f (new)

Motion for a resolution

Amendment

15f. Calls for a dedicated funding stream for energy renovations of buildings to foster the planned 'renovation wave' through the necessary financial means under the Recovery Plan; stresses that in the upcoming proposal on the renovation wave and Member States obligation to set out long-term strategies to achieve a highly energy efficient and decarbonised building stock, the energy efficiency first principle should be fully prioritised and should thereby accelerate deep renovations and the replacement of fossil fuel based and inefficient heating and cooling systems; underlines that integrated deep renovation programmes covering entire communes or districts can be deployed at lower cost and at higher speed, if they are organised under a model, in particular thanks to economy of scale, 3D-technologies and pre-fabricated materials; points to the fact that SMEs contribute to 70% of value added in the construction sector and employ more than 90% of workers;

Or. en

Amendment 485

Jens Geier, Maria-Manuel Leitão-Marques, Łukasz Kohut, Nicolás González Casares, Robert Hajšel, Carlo Calenda

Motion for a resolution

Paragraph 15 f (new)

Motion for a resolution

Amendment

15f. Highlights the need to include to a maximum the employees of the European industry in the twin transition; further highlights the need of new skills for a higher degree of decarbonisation and digitalisation; in this respect welcomes the update of the European Skills Agenda; encourages the Commission to implement dialogue with citizens and trade unions into their political processes regarding the industrial transition; considers that the European Climate Pact is an important step in this direction and believes that such a pact could also be set up for the future of the European industry;

Or. en

Amendment 486

Michael Bloss

on behalf of the Greens/EFA Group

Marc Botenga

Motion for a resolution

Paragraph 15 g (new)

Motion for a resolution

Amendment

15g. Highlights the need for a dedicated building renovation fund at EU-level, empowered with budgetary and human resources to provide technical assistance to work with and bolster national partners; to increase the depth and speed of renovation in Europe, thus protecting and creating jobs in the construction

industry and accelerating the uptake of innovation in the building renovation value chain;

Or. en

Amendment 487

Michael Bloss

on behalf of the Greens/EFA Group

Ignazio Corrao, Eleonora Evi

Motion for a resolution

Paragraph 15 h (new)

Motion for a resolution

Amendment

15h. Reiterates that renewable industries should play a major role in the recovery phase, by creating new, local and green jobs in the downstream sector (project development, installation, etc.) and boosting the manufacturing of equipment, in particular wind and solar; calls on the Commission to bring forward a 2030 pan-European 75 million Solar rooftop programme, as part of the upcoming Renovation Wave, including mandatory solar installations in public buildings; stresses that upcoming recovery programs need to provide grants, loans, tax incentives for SMEs, commercial and industrial buildings to invest into solar energy sourcing and storage, remove national barriers for solar rooftops as well as renewable power purchase agreements;

Or. en

Amendment 488

Michael Bloss

on behalf of the Greens/EFA Group

Ignazio Corrao, Eleonora Evi

Motion for a resolution

Paragraph 15 i (new)

Motion for a resolution

Amendment

15i. *Points to the fact that energy efficiency, energy savings and renewable energy technologies are indispensable for a successful transition towards a net-zero-GHG emission economy; stresses that large-scale deployment of cost-competitive renewable energy capacities is required in all sectors of the economy; recognises that the EU holds 40% of renewable energy patents globally, whereas it should remain a leader in breakthrough renewable technologies; stresses hence the need to develop a robust industrial policy for renewables- encompassing both supply-side and demand-side policies and enable a “renewable sector-integration - is critical to ensure Europe’s long-term security of energy supply, technology leadership and strategic autonomy; urges renewable energy technologies to be acknowledged as a key Strategic Value Chain, respectively key industrial ecosystem, and be eligible to financing from the Strategic Investment Facility, and adequately represented in the upcoming Industrial Forum;*

Or. en

Amendment 489

Michael Bloss

on behalf of the Greens/EFA Group

Motion for a resolution

Paragraph 15 j (new)

Motion for a resolution

Amendment

15j. *Points to the fact that process heating and cooling remain one of the most significant energy use in the industrial sector; underlines that to accelerate the reduction effort of GHG*

emission in industry the energy efficiency potentials in industrial heating and cooling needs to be fully tapped, with increased renewables based electrification, heat-pumps, better use of industrial clusters and symbioses offering significant reduction potentials in many sectors including textile, chemicals, food processing and machinery; demands to prioritise innovation in low-temperature processes in pilot and R&D funds;

Or. en

Amendment 490

Michael Bloss

on behalf of the Greens/EFA Group

Motion for a resolution

Paragraph 15 k (new)

Motion for a resolution

Amendment

15k. Calls on the Commission to develop a European export strategy for renewable and resource-and energy-efficient technologies;

Or. en

Amendment 491

Michael Bloss

on behalf of the Greens/EFA Group

Motion for a resolution

Paragraph 15 l (new)

Motion for a resolution

Amendment

15l. Stresses the need for building now the foundations of a European zero-emissions mobility industry, which is able to meet the increasing demand for alternatives to combustion engines and charging infrastructure both for cars,

vans, buses and trucks, but also boost supply for the rail and zero-emission public transport sector; emphasis that this will need to be accompanied with reskilling programmes, providing new career opportunities to workers leaving the fossil fuel-based transport sector;

Amendment 492

Michael Bloss

on behalf of the Greens/EFA Group

Ignazio Corrao, Eleonora Evi

Motion for a resolution

Paragraph 15 m (new)

Motion for a resolution

Amendment

15m. Insists on renewables-based electrification as a cost effective and technically feasible mean to switch to renewable energy and phase out fossil fuels complements the efficiency first principles central driver of the industrial transformation; recognises that where not feasible, such as for the decarbonisation of some key energy-intensive industries, as in the steel, cement or chemical sector, green hydrogen may play a role in helping them to reduce their process emissions provided it is fully based on renewables; acknowledges that currently the production of hydrogen is costly and resources are limited; is highly concerned by the fact that today 95% of hydrogen production is based on fossil fuels; stresses hence that a European industrial policy must foster the maximisation of renewable electricity generation, more research and pilot projects on a new generation of 100%renewables based hydrogen assets (ex. electrical furnaces), as well as electrolysers, a key technology where the EU could show technological leadership; stresses that due to the huge

amounts of energy required for its production, the application of hydrogen should be targeted to the sectors where direct electrification is not possible for technological or economic reasons;

Angelika Winzig, Tom Berendsen

Motion for a resolution
Paragraph 16 a (new)

Motion for a resolution

Amendment

16a. Reminds that the Conclusions of the European Council on the Communication on a European Green Deal and the content of this Communication identify carbon-intensive sectors and energy intensive industries as being indispensable for the supply of key value chains and that, consequently, an enabling framework must be put in place, which allows their transformation, which means attaining CO2-emission neutrality via integrated evolution rather than restructuring. The Conclusions of the European Council together with the Communication on the Green Deal further identify a range of measures, which, if specifically designed for energy intensive industries and implemented as a whole, would significantly contribute to this objective. These dedicated measures should be combined into an “Energy Intensive Industries Transformation Package” to be mainstreamed into all implementing initiatives and legislation of the Green Deal and the Recovery Plan;

**Motion for a resolution
Paragraph 17 a (new)**

Motion for a resolution

Amendment

17a. Highlights that the competitiveness of European industry can only be backed by an efficient infrastructure network; calls for a long-term investment policy for equipping and renovating infrastructure and for reducing the administrative barriers which hinder the progress of the trans-European networks; calls for more funding for Connecting Europe Facility in order to boost investments in electricity infrastructures, interconnections, digitalisation and smart grids; stresses the need to expedite green Projects of Common Interest (PCI), and revise the Trans-European Energy Networks (TEN-E) Regulation as soon as possible. In particular, in the expected revision of the TEN-E, the Commission should recognise investment in building renovations, including public buildings, as a PCI;

Amendment 533

Michael Bloss

on behalf of the Greens/EFA Group

Motion for a resolution

Paragraph 17 a (new)

Motion for a resolution

Amendment

17a. Calls on the Commission to ensure an harmonised EU-wide approach for Member States to incentivise and support investments in zero emission production processes, technology-specific schemes, accessible to industrial actors from different sectors, to be granted in an open, transparent manner, in order to trigger investments where expected pay-back periods extent beyond the industry standards, and that cannot be recovered from the markets or cannot be passed on along the value chain; stresses that such instruments shall not interfere with state aid and be conditional to companies upon adoption of a credible GHG emission reduction plan to net-zero;

Or. en

Amendment 534

Pietro Fiocchi

Motion for a resolution

Paragraph 17 a (new)

Motion for a resolution

Amendment

17a. Calls on the Commission to revive and update the ideas underpinning the Small Business Act by introducing initiatives designed to support in particular micro- and small enterprises, which make up more than 99% of the EU's manufacturing fabric; takes the view that 'one-size-fits-all' initiatives for SMEs do not foster the right approach towards MSMEs and that the broadening

of the scope of many measures to cover mid-caps has thrown that mismatch into sharper relief; considers that backing for MSMEs must also take the form of support for the incremental innovation which is typical of enterprises of this kind;

Amendment 535

Paolo Borchia, Isabella Tovaglieri, Joëlle Mélin, Thierry Mariani, Jérôme Rivière, Andrea Caroppo

Motion for a resolution

Paragraph 17 a (new)

Motion for a resolution

Amendment

17a. Calls on the Commission to recover, by renewing it, the spirit of the Small Business Act, through initiatives aimed in particular at supporting micro and small-size enterprises, which provide for over 99% of the European production capacity; worries that "one size fits all" initiatives for SMEs do not favour either micro-enterprises or SMEs, while expanding many of such measures to mid-caps has further stressed this gap; stresses that support for micro-enterprises and SMEs must also come by boosting incremental innovation;

Amendment 536

Patrizia Toia

Motion for a resolution

Paragraph 17 a (new)

Motion for a resolution

Amendment

17a. Calls on the Commission to retrieve and renew the spirit of the Small

Business Act, through initiatives aimed at supporting especially the micro and small businesses, as often the "one size fits all" measures do not ensure the appropriate approach to micro and SMEs; believes that ad hoc supporting measures will have to address SMEs, avoiding bureaucratic obstacles, ensuring that the necessary liquidity reaches companies through effectively and accessible tools characterized by fast, agile and SME-friendly procedures;

Amendment 537

Michael Bloss

on behalf of the Greens/EFA Group

Motion for a resolution

Paragraph 17 b (new)

Motion for a resolution

Amendment

17b. Asks the Commission to look into 'carbon contracts for difference' (CCD), which would be concluded after a competitive tendering process and which would guarantee the reimbursement of the difference between the current CO2 price and the actual CO2 avoidance costs that companies incur as a result of investments in new processes and technologies; asks the Commission to define technology benchmarks that projects must satisfy to be considered compatible with the net-zero GHG emission goal; considers that the resulting costs of the CCDs could be refinance through a climate contribution that is added to the related products in the industry applying both to domestic and imported products, in order to ensure a fair distribution of costs and ensure that investments in GHG-free technologies pay off immediately and short-term competitive disadvantages compared to

countries without corresponding CO2 pricing are avoided;

Amendment

18a. Highlights that EU industrial competitiveness relies on a fully functioning Single Market in Products and Services; underlines that the

Commission must consider how to deepen the Single Market as part of any revised set of priorities and address the existing regulatory and non-regulatory internal market barriers stemming from restrictive and complex national rules, limited administrative capacities, imperfect transposition of EU rules, as well as their inadequate enforcement; stresses the importance of more flexible and transparent governance of the internal market with more effective peer reviews to identify and address barriers and non-compliance, improved monitoring and performance tools such as Internal Market Scoreboard to better reflect market reality, as well as strengthened SOLVIT network;

Amendment 557

Michael Bloss

on behalf of the Greens/EFA Group

Motion for a resolution

Paragraph 18 a (new)

Motion for a resolution

Amendment

18a. Underlines the key role of the digital sector in contributing to the transformation of the industrial sector, both as a source of clean technology solutions and optimisation of industrial processes and minimising its environmental impact; given the high consumption of energy and resources connected with ICT, asks the Commission to assess the potential environmental impact of the massive development of digital solutions and to put energy efficiency and circular economy requirements at the heart of the development of digital technologies and data centres; asks the Commission to propose concrete avenues for digital

solutions to serve the ecological transition and to establish a methodology for monitoring and quantifying the increasing environmental impact of digital technologies;

Josianne Cutajar, Maria-Manuel Leitão-Marques, Adriana Maldonado López, Robert Hajšel, Carlos Zorrinho, Romana Jerković, Lina Gálvez Muñoz, Alicia Homs Ginel, Nicolás González Casares

**Motion for a resolution
Paragraph 18 a (new)**

Motion for a resolution

Amendment

18a. Regrets the still significant gap between large and small/medium enterprises with reference to the integration of digital technologies in their business operations, underlines that bridging this gap would constitute an improvement of the functioning of the internal market and would be beneficial for the overall European industrial competitiveness; calls on the Commission to assess and enhance the outreach of the European Digital Innovation Hubs, which - due to their knowledge of the local economic ecosystems - can represent an effective way to help SMEs digitalise;
