AMENDMENTS

594 - 704

Draft report
Carlo Calenda
(PE650.700v01-00)

A New Industrial Strategy for Europe
(2020/2076(INI))

Amendment 594

Christophe Grudler, Susana Solís Pérez, Dragoş Pîslaru, Dominique Riquet, Ivars Ijabs, Mauri Pekkarinen, Valérie Hayer, Martina Dlabajová, Bernard Guetta, Stéphane Bijoux, Fabienne Keller, Izaskun Bilbao Barandica, Nicola Danti, Sylvie Brunet, Andrus Ansip

Motion for a resolution

Paragraph 20

Motion for a resolution

20. Considers that industrial transformation requires the integration of new knowledge and innovation into existing markets and their use in the creation of new ones; regrets, in this respect, that the Union invests less in R&D as a percentage of GDP than its global competitors and that it suffers from a serious lack of innovative capacity in small and medium-sized enterprises due to a shortfall in the necessary risk capital; calls on the Commission to increase the budget for those programmes that underpin the transformation of the Union's industry, including Horizon Europe, and to foster synergies between regional, national, European and private financial sources by taking advantage of synergies among all Union programmes;

Amendment

20. Considers that industrial transformation requires the integration of new knowledge and innovation into existing markets and their use in the creation of new ones; regrets, in this respect, that the Union invests less in R&D as a percentage of GDP than its global competitors and that it suffers from a serious lack of innovative capacity in small and medium-sized enterprises due to a shortfall in the necessary risk capital; ***highlights the need to increase considerably spending on research, development and innovation as key element to achieve the twin transition, improve strategic leadership and autonomy and increase long-term competitiveness; calls on the Member States to uphold their commitment of reaching 3% of GDP on research and development; Considers an increase of the funding of Horizon Europe as well as Digital Europe programs and Connected Europe Facility (digital and energy) is needed to achieve the ambitious targets. recognise the effective support of European Innovation Council (EIC) and the European Institute for Innovation and Technology (EIT) and calls to strengthen their missions; calls for a public-private collaboration to promote the transfer of knowledge and technology from research centres and universities to the industrial process, taking advantage of the industrial ecosystem scheme; calls on the Commission to increase the budget for those programmes that underpin the***

transformation of the Union's industry, including Horizon Europe **and Digital Europe (DEP)**, and to foster synergies between regional, national, European and private financial sources by taking advantage of synergies among all Union programmes; ***calls on the Commission to target as a priority the whole range of decarbonised and renewable industrial processes; acknowledges the importance of intellectual property protection to incentivise R&D investments necessary to ensure continued participation of EU industry in the development of key technologies like 5G and 6G, necessary to achieve the EU 2025 connectivity objectives;***

Amendment 673

Michael Bloss

on behalf of the Verts/ALE Group

Motion for a resolution

Paragraph 22 d (new)

Motion for a resolution

Amendment

22d. Supports policy measures to make sustainable products the norm, including an expansion of the scope of eco-design with legislation making products more durable, repairable, reusable, toxic free and recyclable, and a strong eco-design and eco-labelling work programme 2020-2024 still to be presented in 2020 and to adopt the measures for each specific

product group as soon as they are ready, including for smartphones and other new IT equipment; implements digital product passport conveying material and chemical contents, circularity performances and carbon and environmental foot printing of products and materials placed on EU market, stresses the need to promote local consumption and production based on the principles of refuse, reduce, reuse, recycle and repair, to stop planned obsolescence business strategies where products are designed to have a short life span and need to be replaced, and to adapt consumption to the carrying capacity of the planet, makes sustainable purchasing mandatory for public authorities and private organisations;

Or. en

Amendment 674

Michael Bloss

on behalf of the Verts/ALE Group

Motion for a resolution

Paragraph 22 e (new)

Motion for a resolution

Amendment

22e. Believes that sustainably-sourced renewable materials will play an important role in the transition to a climate-neutral industry and overall economy, and highlights the need to stimulate investments in the development of a sustainable and circular bio-economy, where fossil-intensive materials are replaced with renewable and bio-based materials which are sustainably sourced and that are kept in use as long as possible in, for example, buildings, textiles, chemical products, packaging, shipbuilding and energy production; stresses that this will have to be done within ecological limits; Stresses the current inconsistencies between the

Union's biodiversity objectives and its bioenergy policy; calls therefore on the Commission to adopt stronger sustainability criteria for bioenergy to ensure its contribution do not harm biodiversity and ecosystems both within and outside the Union; calls for support for research and innovation in sustainable and circular bio-economy solutions that should take into account the need to protect unique biodiversity and ecosystems;

Motion for a resolution

Paragraph 24 g (new)

Motion for a resolution

Amendment

24g. Calls on the Commission to ban all EU funding for non-European or third-country companies that do not in practice respect reciprocity in the access to public procurement;
