

WRITTEN QUESTION P-4022/03  
by Christos Folias (PPE-DE)  
to the Commission

Subject: Comparative data in the olive oil sector

Will the Commission say whether it has comparative data on the results of controls carried out by its services over the last five years in olive oil producing countries as part of annual economic adjustments in the olive oil sector? If so what is this data? Have any penalties been imposed on the basis of the results of these controls in each olive oil producing Member State and if so, which ones?
