to the Commission**

Rule 138

**Marian-Jean Marinescu (PPE)**

Subject: Use of advanced mobile location (AML) technology to improve the 112 emergency call service

In November 2018, the Commission started to roll out advanced mobile 112 caller location technology (AML) in seven Member States. Can the Commission state:

1. whether Romania has sought to participate in that Commission-funded project;
2. whether the 'National emergency call hardware and software infrastructure modernisation' project signed by Romania on 9 August 2019 for RON 183 698 974.87 (ex-VAT) with 85% funding from the EU's 2014-2020 Large Infrastructure Operational Programme also covers the implementation of advanced mobile location technology?
