to the Commission**

Rule 138

Ivan Vilibor Sinčić (NI)

Subject: Right to transparent, publicly available information on mobile base station locations

1. In view of the rapidly growing number of mobile base stations whose antenna systems emit RF EM fields, do EU citizens have the right to be informed about the locations of these sources of non-ionising radiation?
2. If EU citizens need to be informed about the locations of mobile base stations, which EU institution should Croatian citizens contact in order to exercise that right, as the national regulatory agency (HAKOM) does not make that information transparent and publicly available?
