It is noted that Regulation (EU) 2021/241\(^1\) contains a dedicated set of provisions on transparency (Article 25) and does not include any provision providing for an obligation to publish documents such as the loan agreements. Accordingly, the decision to publish the loan agreements related to the implementation of the Recovery and Resilience Facility remains in the discretion of the Member States concerned. Transparency is also ensured by Regulation 1049/2001\(^2\), which provides for the possibility to request access to public documents held by EU institutions in accordance with rules and limits as provided therein.
