The Commission is fully committed to a timely approval of the CAP Strategic Plans (CSP) and contributing to continued food availability and affordability in the EU and globally.

Following the submission of CSP proposals, the Commission services issued observations and are now engaged in intense exchanges with all Member States to solve outstanding issues and agree as soon as possible on a revised version of the Plans that is deemed to respond effectively to key challenges, achieving the various objectives of the Common Agricultural Policy (CAP), and contributing to the European Green Deal, the Farm to Fork and the Biodiversity Strategies.

Discussions with a number of Member States are at a very advanced stage and the Commission is confident that all CSPs will be approved by the end of 2022.
