The cohesion policy financial allocations for Lithuania are programmed in the national multi-
fund programme for the European Union funds’ investments in 2021-2027. The programme
establishes a framework consisting of output and result indicators with the corresponding
targets by each programme priority and category of region allowing monitoring the
performance of the funds and measuring the achievement of the targets (link to the submitted
programme1).

The target values set in the programme are in line with the agreed financial allocations and
investment priorities of both regions and overarching objective to reduce regional disparities
in Lithuania.

The Capital region faces as well social challenges and territorial disparities. In the
negotiations for the transfer, the Commission ensured that the transferred resources would be
used to tackle these challenges. The biggest part of the transferred funds are allocated to
priority 4 ‘Socially responsible Lithuania’ aiming to address the uneven access to healthcare,
social and education services in the region and the challenges brought by hybrid migration
attack from the authoritarian Belarus regime. A large part of the transfer is directed to priority
5 ‘Lithuania closer to citizens’ – a special method for place-based development targeting the
less developed municipalities of the Capital Region.
