Amendment 372
Rosa D'Amato

Proposal for a regulation
Article 1 – paragraph 1 – point 12
Regulation (EC) No 1224/2009
Article 15 – paragraph 2 a (new)

Text proposed by the Commission

Amendment

2a. Masters of Union catching vessels of less than 10 metres' length overall shall submit the information referred to in Article 14 to the competent authority of their flag Member State by electronic means or alternatively on paper at weekly intervals.

Amendment 373
Romana Tomc, Franc Bogovič, Balázs Hidvéghi, Milan Zver

Proposal for a regulation
Article 1 – paragraph 1 – point 12
Regulation (EC) No 1224/2009
Article 15 – paragraph 3

Text proposed by the Commission

Amendment

3. Masters of Union catching vessels shall also send **electronically** the information referred to in Article 14 at the time of any inspection and upon request of the competent authority of their flag Member State.

3. Masters of Union catching vessels shall also send the information referred to in Article 14 at the time of any inspection and upon request of the competent authority of their flag Member State.

Or. en

Justification

The deadline for the submission for masters of Union catching vessels of less than 12 metres' length overall should remain within 48 hours of landing for paper logbooks. The possibility to introduce electronic logbooks for vessels of less than 12 metres' length overall should be left to the Member States.

Amendment 374

Pierre Karleskind, Stéphanie Yon-Courtin

Proposal for a regulation

Article 1 – paragraph 1 – point 12

Regulation (EC) No 1224/2009

Article 15 – paragraph 5 a (new)

Text proposed by the Commission

Amendment

5a. For vessels of less than 12 metres' length overall, the provisions of this Article shall apply from ... [4 years after the entry into force of this Regulation].

Or. fr

Justification

La transmission électronique des journaux de pêche est actuellement uniquement obligatoire pour les navires de pêche d'une longueur hors tout de 12 mètres au moins. L'obligation pour les navires de pêche d'une longueur hors tout inférieure à 12 mètres de transmettre électroniquement leur journal de bord nécessite donc une période d'adaptation. Pour ce faire, contrairement aux autres dispositions de ce règlement qui seront applicables 2 ans après l'entrée en vigueur du présent règlement, les dispositions de cet article qui concernent les navires d'une longueur hors tout inférieure à 12 mètres bénéficieront de 2 ans supplémentaires avant d'être applicables. Elles seront donc applicables 4 ans après l'entrée en vigueur du présent règlement.

Fishing vessels not covered by fishing logbook requirements

1. Each Member State shall monitor, by sampling, the activities of fishing vessels and natural persons not covered by the requirements set out in Articles 14 and 15 in order to ensure compliance with common fisheries policy rules.

2. For the purposes of the monitoring referred to in paragraph 1 of this Article, each Member State shall establish a sampling plan based on the methodology approved by the Commission under the procedure set out in Article 119 and forward it every year by 31 January to the Commission indicating the methods used for the establishment of this plan. The sampling plans shall be, as far as possible, stable over time and standardised within the relevant geographical areas.

3. By way of derogation from paragraphs 1 and 2 of this Article, sales notes submitted in accordance with Articles 62 and 63 shall be accepted as an alternative measure to sampling plans.’

Article 17 – paragraphs 1, 1a and 6

Text proposed by the Commission

Amendment

[...]

Or. it

Justification

It is considered sufficient to retain the current provisions, as new and future MAPs already contain specific provisions relating to prior notification. Subjecting fishing vessels with an overall length of less than 12 metres to the requirement of prior notification would be an error given the size of the vessels, many of which either have no engine or only a low-power one, and which lack refrigeration systems for keeping fish, which would be forced to wait before returning to port to land their catch as a result of the prior notification requirement of 4 hours.

Or. en

Justification

Certain artisanal vessels spend only short times at sea on any given trip. A requirement for

these vessels to make notifications four hours before arrival at port would be impossible in most cases and such notification should be permissible immediately before the landing and weighing of fish.

1. ***Without prejudice to specific provisions contained in multiannual plans***, masters of Union fishing vessels of 12 metres' length overall or more shall notify by electronic means the competent authorities of their flag Member State at least four hours before the estimated time of arrival at port of the following information:

1. Masters of Union fishing vessels of 12 metres' length overall or more ***engaged in fisheries on stocks subject to a multiannual plan*** shall notify by electronic means the competent authorities of their flag Member State at least four hours before the estimated time of arrival at port of the following information:

Or. en

Justification

Prior notification of arrival at port should be mandatory only for fishing vessels of 12 metres' length overall or more engaged in fisheries on stocks subject to an EU multiannual plan. In other cases it is not justified by the objectives pursued and represents disproportionate burden for fishers and Member States.

Proposal for a regulation

Article 1 – paragraph 1 – point 15 – point b

Regulation (EC) No 1224/2009

Article 17 – paragraph 1 a

Text proposed by the Commission

1a. The coastal Member State may set a shorter period of prior notification for vessels flying its flag which operate exclusively within its territorial waters provided that it does not impair the ability of Member States to carry out inspections.

Amendment

1a. The coastal Member State may set a shorter period of prior notification for vessels flying its flag which operate exclusively within its territorial waters **or which belong to the small-scale coastal fleet**, provided that it does not impair the ability of Member States to carry out inspections.

Or. es

Justification

Limiting flexibility in the prior notification period to vessels operating exclusively in territorial waters (12 miles) would exclude a large coastal fleet operating in waters adjacent to territorial seas and making catches and fishing trips very close to port. This flexibility should therefore be extended to cover the entire small-scale coastal fleet.

Proposal for a regulation

Article 1 – paragraph 1 – point 15 – point b a (new)

Regulation (EC) No 1224/2009

Article 17 – paragraph 1 b (new)

Text proposed by the Commission

Amendment

(ba) The following paragraph 1b is inserted:

‘1b. Where catches are made between the time of notice being issued and arrival at port, these shall be notified additionally after they have been retained on board, before entering port.’

Or. es

Justification

The fact that catches are sometimes made very close to ports and shortly before the end of fishing operations makes it advisable to include this provision.

Proposal for a regulation

Article 1 – paragraph 1 – point 18

Regulation (EC) No 1224/2009

Article 19a – paragraph 1

Text proposed by the Commission

1. Union fishing vessels shall only be authorised to land in ports outside Union waters if they have notified by electronic means the competent authorities of their flag Member State at least **3 days** before the estimated time of arrival at port of the information listed in paragraph 3 and the flag Member State has not denied the authorisation to land within this period of time.

Amendment

1. Union fishing vessels shall only be authorised to land in ports outside Union waters if they have notified by electronic means the competent authorities of their flag Member State at least **4 hours** before the estimated time of arrival at port of the information listed in paragraph 3 and the flag Member State has not denied the authorisation to land within this period of time.

Or. it

Justification

In some cases, 3 days far exceeds the actual length of the crossing.

information available, there are reasonable grounds to believe that the fishing vessel is not complying with the rules of the common fisheries policy, the competent authorities of the flag Member State shall request the cooperation of the third country where the vessel intends to land in view of a possible inspection.

Or. en

Justification

When the flag Member State has the power to require the fishing vessel to land in a different port or delay the time of arrival at port or of landing it seriously jeopardises fishing operations and the quality of the catch. The catch may even be spoiled and bring about economic consequences.

Proposal for a regulation
Article 1 – paragraph 1 – point 19
Regulation (EC) No 1224/2009
Article 20 – paragraph 2a

Text proposed by the Commission

2a. Without prejudice to Article 4(4) of Council Regulation (EC) No 1005/2008 and Article 43(3) of this Regulation, Union donor vessels and Union receiving vessels shall only be authorised to tranship at sea outside Union waters or in ports of third countries subject to an authorisation received from their flag Member State(s).

Amendment

2a. Without prejudice to Article 4(4) of Council Regulation (EC) No 1005/2008 and Article 43(3) of this Regulation, Union donor vessels and Union receiving vessels shall only be authorised to tranship at sea outside Union waters or in ports of third countries subject to an authorisation received from their flag Member State(s). ***However, trans-shipments at sea in Union waters shall be permitted in some pelagic fisheries where vessels are many miles from land and their catches are so small that it would be inefficient for a vessel to return to port in order to sell its catch.***

Justification

In pelagic fisheries, where vessels operate a long way from land and catch only small quantities and fish have to be thrown back because the quality of, for example, horse mackerel, anchovies, or sardines deteriorates sharply overnight, even when properly conserved, it would be a totally inefficient way of proceeding if, on account of the above obligation, a vessel had to return to port in order to sell its catch. Indeed, it might not even be economically viable to do so.

Article 1 – paragraph 1 – point 23

Regulation (EC) No 1224/2009

“Article 25a

Control of the landing obligation

1. Member States shall ensure effective control of the landing obligation. For this purpose a minimum percentage of fishing vessels fishing for species subject to the landing obligation and flying their flag established in accordance with paragraph 2, shall be equipped with continuously recording Closed-Circuit Television (CCTV) systems incorporating data storage.

2. The percentage of fishing vessels referred to in paragraph 1 shall be established for different risk categories in specific control and inspection programmes adopted pursuant to Article 95. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 119(2).”

Or. it

Justification

The possibility of installing CCTV cameras on board seems overly complex, difficult to implement and unlikely to be acceptable, especially for small-scale fishing vessels. Moreover, the installation and management of such equipment would impose a very heavy economic burden on operators, whose resources are very often limited. Finally, there are serious doubts as to the protection of privacy.

For this purpose a minimum percentage
of fishing vessels fishing for species
subject to the landing obligation and
flying their flag established in accordance
with paragraph 2, shall be equipped with

Or. it

Justification

The use of CCTV is complex and difficult to arrange, particularly on small Mediterranean fishing vessels and given the type of fishing customarily practised in that area. For SMEs, and in particular those with smaller tonnage vessels engaged in small-scale fisheries (often managed in minimal ways and using minimal equipment), problems in adapting to new technologies can be expected unless practical support is provided to assist innovation.

Or. fr

Justification

Cet amendement propose de ne pas fermer la porte aux autres technologies que les CCTV qui permettent une surveillance électronique avec enregistrement continu intégrant le stockage des données. Les navires qui doivent mettre progressivement en place ces systèmes de surveillance ont un longueur hors tout de 12 mètres au moins et sont identifiés conformément à la procédure de l'article 95 comme étant à risque élevé ou très élevé de non-respect de l'obligation de débarquement. Proposal for a regulation

Article 1 – paragraph 1 – point 23

Regulation (EC) No 1224/2009

Article 25a – paragraph 1

Text proposed by the Commission

1. Member States shall ensure effective control of the landing obligation. ***For this purpose a minimum percentage of fishing vessels fishing for species subject to the landing obligation and flying their flag established in accordance with paragraph 2, shall be equipped with continuously recording Closed-Circuit Television (CCTV) systems incorporating data storage.***

Amendment

1. Member States shall ensure effective control of the landing obligation. ***To that end, Member States may deploy control observers on board fishing vessels flying their flag for the monitoring of fisheries subject to the landing obligation. All costs arising from the operation of control observers under these arrangements shall be borne by the flag Member States. Member States may not charge those costs, in part or in full, to the operators of the fishing vessels flying their flags involved in the relevant fishery.***

Amendment 491
France Jamet

Proposal for a regulation
Article 1 – paragraph 1 – point 23
Regulation (EC) No 1224/2009
Article 25a – paragraph 1

Text proposed by the Commission

1. Member States shall ensure effective control of the landing obligation. For this purpose *a minimum percentage of fishing vessels fishing for species subject to the landing obligation and flying their flag, established in accordance with paragraph 2, shall be equipped with continuously recording Closed-Circuit Television (CCTV) systems incorporating data storage.*

Amendment

1. Member States shall ensure effective control of the landing obligation. For this purpose *Member States may decide to put this control in place.*

Amendment 492
Tatjana Ždanoka, Diana Riba i Giner

Proposal for a regulation
Article 1 – paragraph 1 – point 23
Regulation (EC) No 1224/2009
Article 25a – paragraph 1

Text proposed by the Commission

1. Member States shall ensure effective control of the landing obligation. For this purpose a minimum percentage of fishing vessels fishing for species subject to the landing obligation and flying their flag established in accordance with paragraph 2, shall be equipped with continuously recording Closed-Circuit Television (CCTV) systems incorporating data storage.

Amendment

1. Member States shall ensure effective control of the landing obligation. For this purpose a minimum percentage of fishing vessels, *according to the risk categories in specific control and inspection programmes adopted under Article 95*, fishing for species subject to the landing obligation and flying their flag established in accordance with paragraph 2, shall be equipped with continuously

recording Closed-Circuit Television (CCTV) systems *or other alternative discard-monitoring systems* incorporating data storage.

Or. en

Justification

The presumption of innocence is a legal principle that must be maintained in all fields, including inspections in the EU fisheries sector. The obligation to install on-board cameras and other discard-monitoring equipment will thus apply only to vessels identified as having a high risk of non-compliance with the landing obligation.

Amendment 493

Peter van Dalen, Annie Schreijer-Pierik

Proposal for a regulation

Article 1 – paragraph 1 – point 23

Regulation (EC) No 1224/2009

Article 25a – paragraph 1

For this purpose *a minimum percentage of* fishing vessels *fishing for species* subject to the landing obligation *and* flying their *flag established in accordance with paragraph 2, shall be equipped with continuously recording Closed-Circuit Television (CCTV) systems incorporating data storage.*

Amendment

1. Member States shall ensure effective control of the landing obligation. For this purpose, *Member States may deploy control observers on board* fishing vessels *flying their flag for the monitoring of fisheries* subject to the landing obligation. *All costs arising from the operation of control observers under this scheme shall be borne by the flag Member States. Member States shall not charge these costs, in part or in full, to the operators of the fishing vessels flying their flags involved in the relevant fishery.*

Amendment 494

Manuel Bompard

Proposal for a regulation

Article 1 – paragraph 1 – point 23

Text proposed by the Commission

1. Member States shall ensure effective control of the landing obligation. For this purpose ***a minimum percentage of fishing vessels fishing for species subject to the landing obligation and flying their flag, established in accordance with paragraph 2,*** shall be equipped with continuously recording Closed-Circuit Television (CCTV) systems incorporating data storage.

Amendment

1. Member States shall ensure effective control of the landing obligation ***and the collection of reliable data on catches and incidental catches of sensitive species.*** For this purpose ***all European Union*** fishing vessels ***of over 12 metres' length*** shall be equipped with ***remote electronic monitoring systems consisting in particular of the installation of*** continuously recording Closed-Circuit Television (CCTV) systems incorporating data storage.

Or. fr

Justification

Remote electronic monitoring systems have the potential to bring about significant improvements in data collection and the protection of sensitive species, and their use should therefore be extended to cover objectives other than the monitoring of compliance with the landing obligation. The broader range of checks made possible by remote electronic monitoring systems should be introduced wherever possible, in order to guarantee optimum application of the rules of the common fisheries policy.

Amendment 508
Manuel Bompard

Proposal for a regulation
Article 1 – paragraph 1 – point 23
Regulation (EC) No 1224/2009
Article 25a – paragraph 2

Text proposed by the Commission

2. The **percentage of fishing vessels** referred to in paragraph 1 shall **be established for different risk categories** in specific control and inspection programmes adopted pursuant to Article 95. **Those programmes shall also determine the risk categories and the types of fishing vessels included in such categories.**

Amendment

2. The **obligation** referred to in paragraph 1 shall **also apply to a minimum percentage of vessels of less than 12 metres' length, defined in accordance with the number of vessels identified as posing a high or very high risk of non-compliance with the rules of the common fisheries policy** by specific control and inspection programmes adopted pursuant to Article 95.

Or. fr

Justification

Regardless of their size, vessels posing a high risk of non-compliance with the rules of the common fisheries policy must be equipped with effective monitoring systems. This requirement is justified by the need to preserve fishery resources which could be adversely affected by non-compliance, including by vessels of less than 12 metres' length, with the rules of the common fisheries policy and, in particular, the rules designed to keep incidental catches of sensitive species to a minimum.

Both the installation of electronic monitoring systems and the storage and transmission of the data generated shall respect the confidentiality and privacy of personal information.

Or. es

Justification

En su Dictamen sobre la propuesta de la Comisión, el Comité Económico y Social Europeo se declaró contrario a la obligación indiscriminada de instalar sistemas de CCTV en las embarcaciones, por ser contraria al derecho laboral, al derecho a la privacidad y al secreto comercial. Siguiendo sus recomendaciones, y a fin de controlar el cumplimiento de la obligación de desembarque, proponemos reforzar el uso de los observadores a bordo y crear un mecanismo voluntario de introducción de los CCTV con incentivos. La instalación obligatoria de sistemas de CCTV se debe circunscribir a aquellas embarcaciones que hayan cometido infracciones graves.

Amendment

3a. In addition to electronic monitoring systems used to check compliance with the landing obligation, Member States may also support the use of systems which make for closer monitoring of the selectivity of fishing operations directly on gear.

Or. fr

Justification

Many innovations are being developed, such as real-time digital recognition software or other artificial intelligence-based tools, which will make for closer monitoring of the selectivity of fishing operations directly on gear. Since the purpose of the landing obligation is to encourage greater selectivity, these tools must be used in order to make fishing operations more selective in nature, rather than simply promoting ex post monitoring of fishing operations by means of CCTV.

Søren Gade

Proposal for a regulation

Article 1 – paragraph 1 – point 23

Regulation (EC) No 1224/2009

Article 25a – paragraph 4 a (new)

Text proposed by the Commission

Amendment

4a. In regard to the application of paragraphs 1 and 3 the Commission is empowered to adopt delegated acts in accordance with Article 119a of this Regulation and Article 18 of Regulation (EU) No 1380/2013 by specifying details regarding technical measures and control measures by derogation from this Regulation and technical and control measures in other regulations including regulations on multiannual plans.

Or. en

Justification

It is important not just to add additional layers of legislation without analysing if simplifications can take place. Therefore the proposal should allow for simplification of measures in exempting vessels equipped with this new control tool from other existing legislation such as for instance control or technical conservations measures to the extent that these rules are not considered to have added value after the use of CCTV. Such derogations should be adopted by way of delegated acts following the procedure for regional cooperation and would thus be discussed in the regional groups and in the Expert Group for Fisheries and Aquaculture as well as being scrutinized by the European Parliament.

Amendment

1. Member States shall ensure that vessels ***of more than 10 metres' length overall using such*** fishing gears ***as*** trawls ***and*** seines are equipped with permanently installed devices that measure and record engine power in cases where:

Or. it

Justification

The possibility of installing devices for measuring engine power seems excessively burdensome for small-scale fishing vessels, which, inter alia, would be unlikely to derive much advantage from higher power, given the limited time spent at sea and the small size of the craft. The measurement should also be limited to vessels using fishing methods for which engine power affects fishing effort.

(b) the vessels operate in areas subject to *fishing* effort regimes or restrictions on engine power.

Or. es

Justification

Continuous monitoring of engine power seems unnecessary in those fisheries managed by TACs and quotas, since greater kW power does not directly lead to greater catches. Under the principle of proportionality, such monitoring should be limited to fisheries covered by an EU fishing effort management system. In any case, Member States may use sampling plans in fisheries managed by TACs and quotas.

Amendment

Member States shall ensure that recreational fisheries are conducted in a manner compatible with the objectives and rules of the common fisheries policy.

Or. en

Justification

These measures aim to ensure that recreational fishers are aware of any conservation measure in place when carrying out fishing activities, as is already the case, for example, when hunting activities are conducted. They also aim at allowing coherence between conservation measures adopted for commercial fisheries and measures for recreational fisheries targeting the same stocks or species.

Or. en

Justification

Today, sea anglers in about half of the EU Member States already are obliged to fish under a registration or licensing system. In this proposal Commission gives the Member States a choice between a licensing system or a registration system. In countries where there is currently no system, the Italian case can serve as an example: compulsory registration is free of charge. When launched a few years ago more than 800,000 Italian sea anglers signed up.

(d) the control and marking of gears used for recreational fisheries.

Amendment

(d) the control and marking of gears used for recreational fisheries **and the marking of gears used for recreational fisheries with the exception of fishing rods**.

Or. en

Justification

The marking of recreational fishing gears can help getting rid of illegal nets. In the case of rods, it would lead to extreme administrative burden considering that in some EU countries each household has several rods at home, and they are often borrowed or second-hand bought. It would be disproportionate. The distinction between recreational angling and other forms of recreational fishing is important for the control system to be fit for purpose and enforceable.

Control rules adapted to regional basins

Article 55a

Regional control plans

1. Control measures may be modified or added to take account of the specific

characteristics of regional basins as defined in the multiannual management plans.

2. For this purpose, regional control plans shall be adopted in accordance with the Treaty. The measures to be included in multiannual plans, and the timetable for implementing them, shall be proportionate to the objectives and targets pursued and to the time-frame envisaged.

3. Regional control plans shall be subject to revision following an initial ex post assessment to determine the proportionality and effectiveness of the control measures introduced in the light of the specific characteristics of the regional basins and fisheries concerned.

Or. fr

Justification

Les plans régionaux de contrôle permettront d'adapter les règles de contrôle aux différents bassins régionaux. En effet, les espèces, les écosystèmes marins et les flottes qui composent un bassin maritime ne sont pas les mêmes d'un bassin à l'autre. Il serait donc nécessaire d'ajuster les règles de contrôle aux différents bassins maritimes afin qu'elles soient les plus efficaces et les plus proportionnées possibles et qu'elles contribuent réellement à l'atteinte du RMD. Les règles de contrôle modifiées ne peuvent en aucun cas mener à l'affaiblissement des règles de contrôle de ce règlement et doivent être conformes aux objectifs de durabilité de la Politique commune de la pêche.

1. Fishery and aquaculture products from catching or harvesting shall be put into lots prior to placing on the market, ***in accordance with Directive 2011/91/EU of the European Parliament and of the Council****.

**** Directive 2011/91/EU of the European Parliament and of the Council of 13 December 2011 on indications or marks identifying the lot to which a foodstuff belongs (OJ L 334, 16.12.2011, p. 1).***

Or. es

Justification

Establishing a definition of a lot that goes beyond the provisions of Directive 2011/91/EU of the European Parliament and of the Council of 13 December 2011 on indications or marks identifying the lot to which a foodstuff belongs could hamper innovation in processed products and cause fishing activity and the processing industry to grind to a halt. Moreover, the current definition has proven to be effective, providing information on the identity of products and constituting a valuable source of information for consumers.

Text proposed by the Commission

Amendment

1a. By way of derogation from Article 15(11) of Regulation (EU) No 1380/2013 and in accordance with Community policies on the circular economy, catches that do not comply with minimum conservation reference sizes may be used for charitable and/or social purposes without additional costs for fishing vessels arising from the possible storage of those catches.

Justification

To promote good practices in respect of the circular economy and to prevent food waste, it is desirable to make it possible to put fishery products that are under the minimum conservation reference sizes, to which the discard ban is applicable, not only to use as feed of animal origin but also to charitable uses.
