- First part* ‘To overcome these market failures and to ensure that SMEs continue to play their role as the foundation for the Union economy’s competitiveness, and as a driver for a sustainable economy, small and medium sized enterprises need extra support through debt and equity instruments to be established under the SME window of the InvestEU Fund established by Regulation [...] of the European Parliament and of the Council<sup>52</sup>. The loan guarantee facility put in place under former COSME programme established by Regulation (EU) No 1287/2013 of the European Parliament and of the Council<sup>53</sup> has a proven added value and is expected to bring a positive contribution to at least 500 000 SMEs; a successor will be established under the SME window of the InvestEU Fund. More attention should be paid to better communication and public campaigns in order to increase awareness to potential beneficiaries of the availability of the Programme for SMEs.’
- Second part* ‘To raise the awareness of Union’s actions supporting SMEs, actions that are wholly or partially funded by this Programme, including intermediaries, should incorporate the European emblem (flag) associated to a sentence acknowledging the support received by this Programme.’

*First part*

‘Calls on the Commission and the Member States to place greater emphasis on further investment and research into the development and uptake of precision and digital farming technologies in order to render PPPs more efficient and thus significantly reduce pesticide dependency, as per the aims of the directive, thereby reducing the exposure of both professional users and the general public;’

§ 17

*First part*

‘Notes further that the best pesticide volume reductions are likely to arise from systemic changes that reduce susceptibility to pest attack, favour structural and biological diversity over monocultures and continuous cropping, and reduce pest resistance to active ingredients;’

*Second part*

‘highlights, therefore, the need to focus on, fund and mainstream agro-ecological methods which would make the whole farming system more resilient to pests;’
