JOINT MOTION FOR A RESOLUTION

pursuant to Rule 103(4) of the Rules of Procedure, by

– Jonathan Evans, Elmar Brok, Corien Wortmann-Kool, James Elles, Andreas Schwab and Urszula Gacek, on behalf of the PPE-DE Group
– Erika Mann, Peter Skinner, Jan Marinus Wiersma and Benoît Hamon, on behalf of the PSE Group
– Annemie Neyts-Uyttebroeck and Alexander Lambsdorff, on behalf of the ALDE Group
– Heide Rühle, Kathalijne Maria Buitenweg and Pierre Jonckheer, on behalf of the Verts/ALE Group
– Adam Bielan and Cristiana Muscardini, on behalf of the UEN Group

replacing the motions by the following groups:

– ALDE (B6-0209/2008)
– PPE-DE (B6-0210/2008)
– UEN (B6-0211/2008)
– PSE (B6-0212/2008)
– Verts/ALE (B6-0214/2008)

on the Transatlantic Economic Council
European Parliament resolution on the Transatlantic Economic Council

The European Parliament,

– having regard in particular to its resolution of 25 April 2007 on transatlantic relations and its resolutions of 1 June 2006 on EU-US economic relations and on the EU-US Transatlantic Partnership Agreement,

– having regard to its resolution of 26 September 2007 on the safety of products and particularly toys,

– having regard to its resolutions on climate change, in particular those of 16 November 2005, 26 October 2006 and 14 February 2007,

– having regard to the outcome of the EU-US Summit held on 30 April 2007 in Washington DC, and in particular to its Framework for Advancing Transatlantic Economic Integration between the European Union and the United States of America,

– having regard to the Joint Statement and progress report adopted at the first TEC meeting on 9 November 2007,

– having regard to Rule 103(4) of its Rules of Procedure,

A. whereas the European Parliament and the US Congress have both continuously advocated completing the transatlantic market by 2015,

B. whereas peace, democracy, human rights and the rule of law, international law, sustainable economies and sustainable development are shared common values which constitute the basis for the Transatlantic Partnership, which is a cornerstone of the EU's external policy and its global economic policy,

C. whereas, given their dominant economic role in the world, the transatlantic partners share responsibility for the state of global economic governance and for finding solutions to global economic challenges,

D. whereas a strong and functioning partnership between the EU and the US is vital for shaping global development in keeping with common values and on the basis of effective multilateralism and international law; whereas strong and consistent political leadership is required to enable the partners to reach this goal,

1. Underlines that a close transatlantic partnership is a vital instrument to shape globalisation in the interest of common values and towards an equitable political and economic global order; reiterates its view that a functioning and competitive transatlantic market is the base on which to firmly anchor the transatlantic partnership so as to enable the EU and the US to jointly tackle global political and economic challenges;

2. Strongly supports the process of strengthening transatlantic economic integration started at
the 2007 EU-US Summit by the adoption of the 'Framework for advancing transatlantic economic integration between the EU and the US' and by establishment of the Transatlantic Economic Council (TEC), which is to oversee and accelerate the efforts outlined in the framework;

3. Welcomes the fact that the Commission, on the recommendation of the European Parliament, has decided to have a study carried out on which obstacles need to be dismantled to complete the Transatlantic Market; believes that this document should be widely circulated on both sides of the Atlantic; calls on the Commission to ensure that the outcome of studies on realisation of the transatlantic market is discussed with the relevant parliamentary committees before any specific conclusions are drawn for future recommendations to the TEC;

4. Believes that a roadmap should be drawn up by both administrations by the 2009 EU-US Summit showing how the long-term commitment to the Transatlantic Market can be achieved in a specific framework;

5. Appreciates the progress achieved by the TEC so far in assuming political responsibility for identifying priorities and paving the way for agreements on removing barriers to trade and investment and on fostering competition on the transatlantic market;

6. Takes the view that the results achieved by the TEC since its establishment demonstrate that the transatlantic market cannot be built on administrative work only, but that in order to attain this goal, strong and continuous political guidance is needed; encourages the TEC to continue its efforts with resolve;

7. Stresses the urgent need to sustain the momentum of this process throughout the electoral years of 2008 and 2009, ensuring that both partners continue to move rapidly towards the attainment of common objectives and that executives on both sides remain committed to reaching the final goal;

8. Underlines that achieving concrete progress in particular in the field of accounting standards, securities trading, reinsurance, import safety, suppliers' declarations of conformity and imports of poultry which has undergone pathogen reduction treatments constitutes the list of priorities for the Spring 2008 TEC meeting; considers it important, however, to point in this resolution to several other relevant issues which need to be dealt with by the TEC in future;

9. Calls on the Commission to inform the European Parliament of the results of the study launched to identify the benefits of removing barriers to transatlantic trade and investment, whose completion is expected in 2008;

Financial Services

11. Believes that mutual recognition of securities markets between the US and the EU would be an important step forward, which would improve the efficiency of the transatlantic market by facilitating the access of the EU and the US to a broader and deeper transatlantic market; underlines however, that such a project must be a result of a bilateral agreement, that a framework agreement between the US and the EU which takes fully into account EU legislation on supervision of financial markets should be concluded and that the Commission should not allow bilateral agreements to be concluded between the Member States and the US, as this could endanger the level playing field adopted in the EU;

12. Stresses that safeguarding financial stability is of the utmost importance; recalls the role of the IMF in this respect; stresses the shortcomings highlighted by the financial turmoil, in particular relating to the ongoing crises in key financial markets, growing imbalances in currency alignments and trade relations, the ongoing or reappearing debt crisis in some of the poorest countries, and increasing wealth gaps between and within countries; believes that strengthening cooperation between supervisory authorities in the US and those in the EU is vital;

13. Welcomes the approach of the Financial Stability Forum (FSF) and of the IMF to establish a common diagnosis of the financial turmoil and looks forward to conclusions and policy recommendations from the FSF Working Group on Market and Institutional Resilience; is of the view however that such work should only be complementary and should not replace reflections and decisions about appropriate policy responses of the EU and of the US;

14. Calls on the US to keep the EU informed about the progress of the implementation of the Basel II framework in the US; recalls the importance of a coordinated approach when developing or modifying global rules for internationally active financial market players; in this respect believes that implementation of Basel II in the US is vital to preserve a level playing field globally;

15. Welcomes the work of Congress on introducing legislation to create a Federal Office of Insurance Information within the US Treasury; believes that alongside the US Treasury 'Blue Print' this is an important step in the direction of mutual recognition of regulatory approaches to financial services across the Atlantic; recognises that much has still to be agreed and that reinsurance collateral is still a key issue to be resolved; believes that Solvency II will be significantly enhanced by closer parliamentary cooperation;

16. Underlines that, in pursuing the goal of creating uniform standards for trade and investment, as discussed at the meeting of the TEC in November 2007 with regard to a roadmap for
achieving mutual recognition in 2009 of EU-US trade partnership agreements, a high level of social, environmental and health standards must be guaranteed;

17. Reiterates that a variety of so-called non-tariff barriers to trade and investment are rooted in conscious activities of legislative bodies in order to foster social, health-related, cultural or environmental objectives, and hence must not be removed without a corresponding legislative act; in this respect, points out the crucial role of the European Parliament and the US Congress in controlling the process of standard alignment and the removal of barriers to trade and investment;

18. Stresses that the safety of imported products should also become a priority within the TEC; takes the view that general confidence in an open trading environment will only be supported by the population if their health and safety is respected; calls on the US Consumer Product Safety Commission to make use of its greater freedom to share case-specific information but proposes that the TEC work on a binding cooperation instrument which would structure and facilitate the sharing of information on product safety and the development of a common programme of cooperative actions; calls on the Commission and the Council to strengthen the cooperation between EU and US customs and market surveillance authorities, in order, without unnecessary bureaucratic burdens, to ensure that controls at external borders are adequate to prevent dangerous products, in particular dangerous toys, from reaching consumers; calls on the EU Member States and the US to ensure strict enforcement of product, and particularly toy, safety laws and stronger national inspections; underlines the need for close EU-US cooperation to ensure that China and other third countries raise their production standards to meet EU/US safety requirements, in particular for toys, and to convince these countries that product safety must be integrated in the production and distribution process;

19. Calls for more information concerning the updated US Consumer Product Safety Act and is concerned that this new instrument will introduce unnecessary regulatory burdens for European companies by imposing mandatory safety requirements with third-party testing; urges that discussions proceed on mutual recognition to avoid duplication;

20. Notes that secure trade is particularly important in an ever more integrated global economy; urges the Commission to continue its efforts to ensure that the US regulation to scan 100% of US-bound cargo is modified towards a risk- and cooperation-based approach entailing mutual recognition of 'authorised economic operators' and of security standards agreed by the World Customs Organisation (C-TPAT, SAFE framework), and calls on the Commission to support a strategy which recognises the important role of European shipping owners and agents on the world scale; calls on the Commission to evaluate the potential costs of the measure regarding the 100% scanning of US-bound maritime cargo containers to business and to the EU economy, as well as the potential impact on customs operations;

21. Calls on the Commission to negotiate within the framework of the TEC, where feasible, common global standards; believes that the enforcement of common automobile safety standards (UN-ECE Global Technical Regulation) would considerably reduce costs for the automobile industry, which is a major employer in both the EU and US;

22. Calls on the Commission to pursue the formal adoption of procedures for the mutual
recognition of declarations of conformity for products subject to mandatory third-party testing, in particular for ICT and electrical equipment;

23. Continues to support the Commission in its efforts to arrive at a mutual agreement for imported products to be labelled with both Imperial and Metric measurements and insists on the need for acceptance of units of measurement agreed under international standards, in particular of metric-only labelled products by the US; considers that this effort will increase economies of scale for European, US and third-country companies and will, in particular, be of benefit to SMEs;

24. Calls on the Commission and the Council to strengthen cooperation between the EU and the US on the globally harmonised system for classification and labelling of substances and mixtures (GHS) in relation to the implementation of the international criteria agreed by the United Nation Economic and Social Council; considers that an important aim of the system is to facilitate trade and reinforce consumer protection, and accordingly insists that the GHS be implemented at the same time and in a compatible way in the EU and the US;

25. Points out that personal data have become an essential ingredient of many business activities, particularly electronic telecommunications; notes that the economic value of personal data and value-added operations based on personal data is growing rapidly; calls on the Commission to take the initiative, in close cooperation with the European Parliament, to elaborate transatlantic data protection principles, together with its counterpart, the US Federal Trade Commission; furthermore calls for the urgent elaboration of global data protection standards in the context of the TEC, so as to guarantee a high level of protection of personal data, and legal certainty for companies;

Agricultural issues

26. Calls for an urgent solution with regard to the ongoing discussions on the ban on imports into the EU of US poultry which has undergone pathogen reduction treatments; acknowledges the need for proper scientific advice with attention to consumer protection and information;

27. Believes that the Community's decision to prohibit the import of hormone-treated beef has been fully justified on the basis of scientific evidence and calls on the US to lift its sanctions on European goods without further delay;

28. Emphasises the importance of the single authorisation procedure for all food and feed containing GMOs in accordance with the precautionary principle and the importance of the labelling and traceability of GMO, enabling consumers to make an informed choice;

29. Calls for dialogue on the recent changes in agricultural markets, in particular concerning fluctuations in commodity prices, the mid-term review of the Common Agricultural Policy ('EU Health Check') and the US Farm Bill, anti-cyclical payments, the growing importance of rural development and the cross-compliance instrument;
**Cooperation over energy, industry and science policies**

30. Calls for strategic transatlantic cooperation over energy, industry and science policies to be stepped up; stresses the importance of the energy issue, supporting the diversification of energy sources and supply routes, ensuring secure energy and infrastructure and promoting market-based energy security policies; notes the increasing debate on both sides of the Atlantic concerning carbon trading systems;

31. Underlines the need for enhanced EU-US regulatory and scientific cooperation on biofuels and biomass, promoting alternative and sustainable fuel sources for the transportation sector on a joint basis; encourages the TEC to continue its work to identify common biofuel standards with Brazil which ensure maximum environmental sustainability and cater for global food security concerns;

**WTO, Doha Development Agenda**

32. Calls on the Commission to work to ensure that the TEC is helpful in achieving a positive conclusion of the Doha Development Agenda; regards the dominance of the EU and US in world trade (currently 60% of the total) as a potential asset for the global trading system and its common framework;

33. Recommends that the Commission evaluate whether a bilateral trade dispute settlement procedure could become a topic of interest for the TEC; notes, in this regard, that while trade disputes have involved only around 2% of trade between the EU and US, some of these disputes are highly disruptive and costly;

34. Recommends that the Commission discuss within the TEC how greater coherence between bilateral trade agreements and the WTO multilateral rules can be found, in order to guarantee a more harmonious and simpler international trading system for all; urges the Commission to discuss how greater alignment can be reached between the EU and the US in signing bilateral agreements with third countries on measures imposing conditions on trade, such as trade and environmental provisions, trade and social standards and trade and labour laws;

35. Calls on the Commission to develop as a matter of urgency a comprehensive approach to European non-trade concerns in world trade talks, in particular on the issues of social and environmental clauses, recognition and protection of geographical indications, animal welfare and the state of health of imported animal and plant products, so as to prevent unfair competition against European producers;

36. Calls on the Commission to request that the TEC issue a progress report on IPR enforcement cooperation activities, including an announcement of future steps to be taken to strengthen cooperation in combating counterfeiting and piracy; requests a clear roadmap to identify efforts to facilitate mutual recognition of patent law internationally;

37. Calls on the TEC to actively support the Doha declaration on the TRIPS Agreement, facilitating access to life-saving medicines for those countries which have no production capacity for pharmaceutical products; calls on the Commission to raise the issue of the US policy of including in bilateral agreements negotiated with developing countries clauses by
which those countries renounce the use of the provision of the Doha Agreement on TRIPS that allows them to produce and import generic drugs that are needed to tackle major public health problems (AIDS, tuberculosis, etc);

38. Regards it as an important task for the European side in the TEC to convince the EU’s transatlantic partners of the need to come to a far-reaching, ambitious and legally binding post-Kyoto regime on greenhouse gas emissions by 2012 and to design a grand transatlantic project for investment and technology exchange in the field of safe and non-polluting energy production;

**Regional development**

39. Stresses the positive impact that further progress in transatlantic economic integration is likely to have on sustainable regional development and is of the opinion that this progress contributes to our efforts to implement the Lisbon Strategy and to move towards social, economic and territorial cohesion; in this context calls on the EU bodies responsible to ensure that this progress contributes to harmonious and balanced development of all EU territories and to take account of the European principle of universal access to services of general interest;

40. Calls on both parties to investigate the possibility of entering into a structured regional policy dialogue between the EU and the US, which would provide a good way of exploring new paths in regional policy, exchanging good practices, inter alia in the areas of research and development, and looking at ways to face common challenges, such as climate change and energy prices;

**Future TLD agenda and structural improvement**

41. Calls on the Transatlantic Legislators' Dialogue to include in the agendas for its upcoming meetings discussion of the US cargo scanning regulation, ensuring that greater mutual understanding develops between the EP and the US Congress on this subject; also stresses the need to reflect within the TLD on a WTO post-Doha agenda, including a WTO reform, and to discuss human rights, environmental and social rights clauses in bilateral trade agreements, drawing lessons inter alia from the most recent US bilateral agreement with Peru, which contains detailed and enforceable provisions on labour standards;

42. Points to the crucial role of the European Parliament and the US Congress in supporting this momentum and to the fact that any non-tariff barriers can only be removed by legislators; proposes to hold a well-prepared annual debate on the progress made on issues discussed within the TEC as well as its structure;

43. Calls therefore upon the leadership of the EU and the US and the co-chairs of the TEC to take into account this crucial role of legislators for the long-term success of the process, and urges them to involve the representatives of the Transatlantic Legislators’ Dialogue fully and directly in the work of the TEC; acknowledges at the same time the importance of the business and consumer stakeholders in providing reflection on, and expert input into, the work of the TEC; is however of the view that their consultative role is to be differentiated
from the legislative role of the US Congress and the European Parliament;

44. Notes the establishment of a Group of Advisers, consisting of representatives of the Transatlantic Legislators' Dialogue, Transatlantic Business Dialogue and Transatlantic Consumer Dialogue; commends the contribution of legislators and stakeholders to the success of the first TEC meeting in November 2007; hopes that the Labour Dialogue and the Environment Dialogue will play a greater role in the near future; calls for the chairs of the Transatlantic Labour Dialogue (TALD) and the Environment Dialogue to be included in the Group of Advisers;

45. Reiterates its desire to reinforce the dialogue between both parliaments and calls for their early involvement in particular as regards any future rules developed by global self-regulatory bodies in order to address, at an early stage, political accountability issues;

46. Believes that these are now issues of a substantive nature and that national parliamentarians should be kept informed of developments on a regular basis; calls on the President of the European Parliament to ensure that a mechanism is established to this end;

47. Instructs its President to forward this resolution to the Council, the Commission, the TEC secretariat, the Parliaments of the Member States and the Congress of the United States of America.
