Provision of food information to consumers as regards the definition of 'engineered nanomaterials'

The European Parliament,

– having regard to the Commission delegated regulation (C(2013)08887),
– having regard to Article 290 of the Treaty on the Functioning of the European Union,
– having regard to Regulation (EU) No 1169/2011 of the European Parliament and of the Council of 25 October 2011 on the provision of food information to consumers¹, and in particular Article 2(2)(t), Article 18(3) and (5) and Article 51(5) thereof,
– having regard to the motion for a resolution by the Committee on the Environment, Public Health and Food Safety,
– having regard to Rule 87a(3) of its Rules of Procedure,

A. whereas Article 18(3) of Regulation (EU) No 1169/2011 on Food Information to Consumers (‘FIC’) provides that all food ingredients present in the form of engineered

¹ OJ L 304, 22.11.2011, p. 18.
⁵ OJ L 80, 26.3.2010, p. 19.
nanomaterials must be clearly indicated in the list of food ingredients to ensure consumer information; whereas, accordingly, FIC provides for a definition of ‘engineered nanomaterials’;

B. whereas Article 18(5) of the FIC Regulation empowers the Commission to adjust and adapt the definition of ‘engineered nanomaterials’ referred therein to technical and scientific progress or to definitions agreed at international level, by means of delegated acts, for the purposes of achieving the objectives of that regulation;

C. whereas Commission Recommendation 2011/696/EU sets out a general definition of nanomaterials;

D. whereas comprehensive Union lists were established by Commission Regulations (EU) No 1129/2011 and (EU) No 1130/2011, setting out the food additives that were permitted for use prior to the entry into force of Regulation (EC) No 1333/2008 after a review of their compliance with the provisions thereof;

E. whereas the Commission delegated regulation excludes all food additives included in the Union lists from the new definition of ‘engineered nanomaterial’ and instead suggests that the need for specific nano-related labelling requirements relating to those additives should be addressed in the context of the re-evaluation programme in accordance with Commission Regulation (EU) No 257/2010, by amending, if necessary, the conditions of use in Annex II to Regulation (EC) No 1333/2008 and the specifications of those food additives, set out in Commission Regulation (EU) No 231/2012;

F. whereas currently, it is precisely food additives that may be present as nanomaterials in food;

G. whereas this blanket exemption annuls the labelling provisions for all food additives that are engineered nanomaterials; whereas this deprives the law of its main ‘effet utile’ and runs contrary to the basic aim of the directive to pursue a high level of protection of consumers’ health and interests by providing a basis for final consumers to make informed choices;

H. whereas the Commission justifies this blanket exemption for all existing food additives by stating that ‘indicating such food additives in the list of ingredients followed by the word “nano” in brackets may confuse the consumers as it may suggest that those additives are new while in reality they have been used in foods in that form for decades’;

I. whereas this justification is erroneous and irrelevant, as the FIC Regulation does not provide for a distinction between existing and new nanomaterials, but explicitly requires labelling of all ingredients present in the form of engineered nanomaterials;

J. whereas the Commission’s stated intention to address the need for specific nano-related labelling requirements concerning food additives on the Union lists in the context of the re-evaluation programme is inappropriate as it confuses safety issues with general labelling requirements for consumer information purposes; whereas this also suggests that the Commission questions the very need for specific nano-labelling, which violates the

provisions of Article 18(3) of the FIC Regulation; whereas either a food additive is a nanomaterial or it is not, and such labelling requirements are to be implemented for all authorised food additives that are nanomaterials irrespective of the conditions of use or other specifications;

K. whereas, moreover, it is unacceptable to refer to an unrelated re-evaluation programme that already existed at the time when the legislator decided to introduce explicit labelling requirements into the FIC Regulation in an attempt to undo those labelling requirements three years later;

1. Objects to the Commission delegated regulation;

2. Considers that the Commission delegated regulation is not compatible with the aim and content of Regulation (EU) No 1169/2011 and that it exceeds the delegated powers conferred on the Commission under the latter;

3. Calls on the Commission to submit a new delegated act which takes into account the position of Parliament;

4. Instructs its President to forward this resolution to the Commission and to notify it that the delegated regulation cannot enter into force;

5. Instructs its President to forward this resolution to the Council and to the governments and parliaments of the Member States.
