ECONOMIC, SOCIAL AND TERRITORIAL COHESION

In order to promote its overall harmonious development, the European Union is strengthening its economic, social and territorial cohesion. In particular, the EU aims to reduce disparities between the levels of development of its various regions. Among the regions concerned, special attention is paid to rural areas, areas affected by industrial transition, and regions which suffer from severe and permanent natural or demographic handicaps, such as the northernmost regions with very low population density, as well as island, cross-border and mountain regions.

LEGAL BASIS

Articles 174 to 178 of the Treaty on the Functioning of the European Union (TFEU).

CONTEXT

Cohesion policy is the European Union’s main investment policy. It provides benefits for all regions and cities in the EU and supports economic growth, the creation of jobs, business competitiveness, sustainable development and protection of the environment.

From its very beginning, there have been large territorial and demographic disparities in the European Community (now the European Union) which could constitute obstacles to integration and development in Europe. The Treaty of Rome (1957) established solidarity mechanisms in the form of two funds: the European Social Fund (ESF) and the European Agricultural Guidance and Guarantee Fund (EAGGF, Guidance Section). In 1975, regional aspects were introduced with the creation of the European Regional Development Fund (ERDF). In 1994, the Cohesion Fund was also created.

With the Single European Act of 1986, economic and social cohesion became a competence of the European Community. In 2008, the Treaty of Lisbon introduced a third dimension of EU cohesion: territorial cohesion. These three aspects of cohesion are supported through cohesion policy and the Structural Funds.

OBJECTIVES

Strengthening its economic, social and territorial cohesion is one of the EU’s main objectives. It dedicates a significant proportion of its activities and budget to reducing the disparities among regions, with particular reference to rural areas, areas affected by industrial transition, and regions which suffer from severe and permanent natural or demographic handicaps.
The EU supports the achievement of these objectives through the use of the European Structural and Investment Funds (the ESF, ERDF, Cohesion Fund, European Agricultural Fund for Rural Development (EAFRD), European Maritime and Fisheries Fund (EMFF)) and from 2021, the Just Transition Fund (JTF).

In 2014, the European Agricultural Fund for Rural Development replaced the Guidance Section of the European Agricultural Guidance and Guarantee Fund. Within the framework of the Union’s cohesion policy, the EAFRD supports rural development and the improvement of agricultural infrastructure.

The European Social Fund (from 2021, called European Social Fund Plus (EFS +)) is the Union’s main instrument supporting measures which aim to prevent and combat unemployment, develop human resources and foster social integration in the labour market. It finances initiatives that promote a high level of employment, equal opportunities for men and women, sustainable development and economic and social cohesion.

The European Regional Development Fund helps to redress the main regional imbalances in the EU. It supports regions whose development is lagging behind, along with the conversion of declining industrial regions.

The Cohesion Fund provides a financial contribution to projects relating to the environment and to trans-European networks in the area of transport infrastructure. This fund may only be accessed by those Member States whose gross national income per inhabitant is lower than 90% of the EU average.

The Just Transition Fund is a key tool for supporting the territories most affected by the transition towards climate neutrality and for preventing an increase in regional disparities. In order to achieve its objective, the JTF supports investments in areas such as digital connectivity, clean energy technologies, the reduction of emissions, the regeneration of industrial sites, the reskilling of workers and technical assistance.

To guarantee efficient use of the Structural Funds, the following principles have to be upheld:

— Organisation of the funds by objectives and regions;
— Partnership between the Commission, Member States and regional authorities in planning, implementing and monitoring their use;
— Programming of assistance;
— Additionality of EU and national contributions.

The allocation of the Union’s financial resources devoted to cohesion policy is focused on two main goals:

— Investment for growth and jobs — aiming to strengthen the labour market and regional economies;
— European Territorial Cooperation — supporting EU cohesion through cooperation at cross-border, transnational and interregional level.

Since 1988, the Union’s cohesion policy has seen a massive increase in its budget and has become, alongside the common agricultural policy, one of the most quantitatively
significant Union policies. For the 2014-2020 programming period, the EU allocated over EUR 350 billion to its cohesion policy, i.e. 32.5% of the overall EU budget. These funds were spent on such varied activities as road-building, environmental protection, investment in innovative enterprises, job creation and vocational training. Almost EUR 200 billion were allocated to the ERDF (including EUR 10.2 billion for European Territorial Cooperation and EUR 1.5 billion as a special allocation for the outermost and sparsely populated regions). Over EUR 83 billion were allocated to the ESF and EUR 63 billion to the Cohesion Fund.

EU COHESION POLICY IN THE PERIOD 2021-2027

In May 2018, the European Commission proposed regulations for the cohesion policy after 2020. One of the major goals of this reform is to simplify the procedures and to increase the effectiveness of EU investments. The eleven thematic objectives used in the 2014-2020 cohesion policy have been replaced by five policy objectives for the ERDF, ESF+, the Cohesion Fund and the EMFF:

— A smarter Europe — innovative and smart economic transformation;
— A greener, low-carbon Europe;
— A more connected Europe — mobility and regional ICT connectivity;
— A more social Europe — implementing the European Pillar of Social Rights;
— A Europe closer to citizens — sustainable and integrated development of urban, rural and coastal areas through local initiatives.

In the period 2021-2027, the EU will be financed through the ‘classic’ multiannual financial framework (MFF) and an extraordinary recovery effort, ‘Next Generation EU’ (NGEU). Cohesion policy will also be financed partly by the MFF and, in the case of some programmes, by the NGEU.

Resources for the ‘Investment for jobs and growth’ goal will amount to a total of EUR 322.3 billion (in 2018 prices) and will be allocated as follows:

a. EUR 202.3 billion for less developed regions;
b. EUR 47.8 billion for transition regions;
c. EUR 27.2 billion for more developed regions;
d. EUR 42.6 billion for Member States supported by the Cohesion Fund (of which EUR 10 billion will be spent on the Connecting Europe Facility instrument);
e. EUR 1 928 million as additional funding for the outermost regions;
f. EUR 500 million for interregional innovation investments.

Resources from the ERDF for the ‘European territorial cooperation’ goal (Interreg) will amount to a total of EUR 8 050 million and will be distributed as follows:

a. EUR 5 812 million for maritime and land cross-border cooperation;
b. EUR 1 466 million for transnational cooperation;
c. EUR 490 million for interregional cooperation;

d. EUR 281 million for outermost regions’ cooperation.

The new Just Transition Fund, which supports the territories most affected by the transition towards climate neutrality and aims to prevent the growth of regional disparities will have a budget of EUR 17.5 billion. EUR 7.5 billion will come from the MMF and additional EUR 10 billion will come from the NGEU.

Another new instrument, ReactEU, was adopted in December 2020. It will act as a top-up for 2014-2020 cohesion programmes and will be additional to the cohesion allocations for 2021-2027. ReactEU will support the most important sectors in making a sound recovery following the COVID-19 crisis. Its allocation (until 2023) is EUR 47.5 billion.

ROLE OF THE EUROPEAN PARLIAMENT

Parliament plays a very active role in supporting the strengthening of the EU’s economic, social and territorial cohesion. The legislation relating to cohesion policy and the Structural Funds is prepared under the ordinary legislative procedure, in which Parliament has an equal say with the Council.

Parliament has been actively involved in the negotiations for the reform of cohesion policy for the 2021-2027 period. This reform defines the priorities and instruments of future EU action aimed at strengthening economic, social and territorial cohesion. Parliament has strongly supported the proposals for a wide-ranging and efficient cohesion policy, which also necessitate sufficient financial resources.
