# LEGISLATIVE TRAIN 04.2025

1 A NEW PLAN FOR EUROPE'S SUSTAINABLE PROSPERITY AND COMPETITIVENESS

INDUSTRIAL ACCELERATOR ACT - Q4 2025

[ ANNOUNCED ]

NL

## CONTENT

As announced in the Commission's work programme for 2025, a legislative proposal for the Industrial Decarbonisation Accelerator Act is foreseen in the fourth quarter (Q4) of 2025.

Initially mentioned in the Competitiveness Compass in January 2025, the Act will build on parts of the provisions for renewable energy and the Net Zero Industry Act to speed up permitting and clean transition of energy-intensive sectors as well as energy infrastructure projects of common interest.

The Act was brought forward again as part of Commission's communication on the Clean Industrial Deal, adopted on 26 February 2025.

According to the text, the Industrial Decarbonisation Accelerator Act will introduce **clean, resilient, circular, cybersecure criteria** to strengthen demand for EU-made clean products and deliver clean European supply for energy-intensive sectors.

It will facilitate **faster permitting** for modernisation and decarbonisation efforts of, in example, steel production sites.

Finally the act will establish a **low-carbon label** to provide consumers with information on the carbon intensity of products. The label will initially cover steel and then cement. According to the Commission the label would help companies achieve a green premium for their products.
