Foreword:

This document contains information on EU and National budgets for the period 1999 - 2009.

Tables 1 - 6 present information on EU and National budgets in billions of Euro and as a per cent of GDP for EU-27, Eurozone and non-Eurozone countries.

Charts 1 - 10 show growth in EU and National budgets, and the difference between growth in National budgets and the EU budget for EU-27, Eurozone and non-Eurozone countries.

National budgets are defined as general government expenditure which covers central government, state government, local government and social security funds. National budget and GDP figures are from Eurostat. Figures on the EU Budget are extracted from the European Commission's annual financial reports and "Detailed data 2000-2009".

Over the period 1999 - 2009 the EU budget grew by 41,76% compared to a fall in the average of the budgets of countries that were Member States at the time of 13,70%. Growth over the period in the average of countries in the Eurozone of 11,10% was more than offset by the fall in the average for non-Eurozone countries of 49,88%.

The budgets of 2 Eurozone countries: Austria (34,92%), Germany (18,45%), and 1 non-Eurozone country: Sweden (13,88%) grew more slowly than the EU budget (41,76%). National budgets grew by more than 100% in 6 Eurozone countries: Ireland (156,75%), Slovakia (146,97%), Cyprus (133,17%), Spain (108,75%), Luxembourg (105,26%) and Greece (104,25%) and 8 non-Eurozone countries: Romania (253,42%), Estonia (189,55%), Latvia (182,68%), Lithuania (180,08%), Bulgaria (171,34%), the Czech Republic (165,50%), Hungary (107,56%) and Poland (105,16%).

The EU budget as a percentage of EU GDP fell from 1,00% in 1999 to 0,99% in 2009. This opposes to an increase in the average of the national budgets as a percentage of GDP for EU Member States from 47,00% to 50,70% over the period. In Eurozone countries the average increased from 48,08% to 50,84% and in non-Eurozone countries from 42,95% to 50,65%.
