

COMMITTEE ON LEGAL AFFAIRS  
- Secretariat - HK/YRM

Brussels, 28 September 2020, 14.00 to 15.45

**VOTING LIST**

on the draft report with recommendations to the Commission on a Digital Services Act: adapting commercial and civil law rules for commercial entities operating online

(2020/2019(INL))

Rapporteur: Tiemo Wölken

Draft report : Fdr 1203569 - PE 650.529 v01-00

Amendments: (AMs 1 - 229) - Fdr 1205955 - PE 642.466 v01-00

(AMs 230 - 490) - Fdr 1206222 - PE 652.517 v01-00

Opinions:IMCO

## ANNEX ON COMPROMISES

### Compromise amendment 1

#### on Recitals and General Provisions

A. Whereas digital services, being a cornerstone in the Union's economy and the livelihood of a large number of its citizens, needs to be regulated in a way that **guarantees** fundamental rights and other rights of citizens **while supporting** development and economic progress, **the digital environment and trust online, taking into account the interests of users and all market participants, including SMEs and start-ups;**

[AMs used: 12-EPP, 13-ECR, 15-GUE, 16-Greens]

B. whereas a number of key civil and commercial law aspects have not been given a satisfactory answer in Union or Member States law, and whereas this issue is accentuated by the rapid and accelerating development over the last decades in the field of digital services, notably the emergence of new business models, **technologies and social realities; whereas in this context, a comprehensive updating of the essential provisions of civil and commercial law applicable to online commercial entities is required;**

[AMs used: 19-EPP]

C. whereas some businesses offering digital services enjoy, due to strong data-driven network effects, **significant market power** that **enables them to impose their business practices on users and** makes it increasingly difficult for other players, **especially start-ups and SMEs, to compete and for new businesses to even enter the market;**

[AMs used: 24-EPP, 25-Renew, 26-ECR, 28-S&D]

D. whereas ex-post competition law enforcement alone cannot effectively address the impact of the market **power** of certain online platforms, **including** on fair competition in the digital single market;

[AMs used: 32-S&D, 33-Renew]

E. whereas content hosting platforms evolved from the mere display of content into sophisticated organisms and market players, in particular social networks that harvest and exploit usage data; whereas users have **legitimate** grounds to expect fair terms **with respect to access, transparency, pricing and conflict resolution** for the usage of such platforms **and for the use that platforms make of users' data; whereas transparency can contribute to significantly increase trust in digital services;**

[AMs used: 36-S&D, 37-GUE, 40-S&D, 35-Renew]

F. whereas content hosting platforms may determine what content is shown to their users, thereby profoundly influencing the way we obtain and communicate information, to the point

that content hosting platforms have *de facto* become public spaces in the digital sphere; whereas public spaces must be managed in a manner that **protects public interests**, respects fundamental rights and the civil law rights of the users, **in particular the right to freedom of expression and information**;

[AMs used: 44-S&D, 45-ECR, 46-EPP covered by AM45]

G. whereas upholding the law in the digital world not only **involves effective** enforcement of **fundamental** rights, **in particular freedom of expression and information, privacy, safety and security, non-discrimination, respect to property and intellectual property rights**, but also access to justice **and due process**; whereas **delegating** decisions regarding the legality of content or of law enforcement powers to private companies **undermines transparency and due process, leading to a fragmented approach**; **whereas therefore, a fast-track legal procedure with adequate guarantees is required to ensure** effective remedy;

[AMs used: 49-EPP, 50-S&D, 51-ECR, 53-GUE]

[For Recital H see CA5 on Notice and Action]

**Ha. whereas Article 11 of the Charter also protects the freedom and pluralism of the media, which are increasingly dependent on online platforms to reach their audiences**;

AMs used: 61-EPP

I. **whereas digital services are used by the majority of Europeans on a daily basis, but are subject to an increasingly wide set of rules from across the EU, leading to significant fragmentation on the market and consequently legal uncertainty for European users and services operating across borders**; whereas the civil law regimes governing content hosting platforms' practices in content moderation are based on certain sector-specific provisions at Union **and** national level, **with** notable differences in the obligations imposed and enforcement mechanisms **deployed**; whereas this situation **has led to a fragmented set of rules for the Digital Single Market, which** requires a response at Union level;

[AMs used: 22-EPP, 62-EPP, 65-Renew]

J. whereas the current business model of certain content hosting platforms is to promote content that is likely to attract the attention of users and therefore generate more profiling data in order to offer more effective targeted advertisements and thereby increase profit; whereas this profiling coupled with targeted advertisement **can lead** to the amplification of content **geared towards** emotions, often **encouraging and facilitating sensationalism** in news feed and recommendation systems, **resulting in the possible manipulation of users**;

AMs used: 66-EPP, 67-S&D

K. whereas offering users contextual advertisements requires less user data than targeted behavioural advertising and thus is less intrusive;

L. whereas the choice of algorithmic logic behind such recommendation systems, **comparison services**, content curation or advertisement placements remains at the discretion of the content hosting platforms with little possibility for public oversight, which raises accountability **and transparency** concerns;

AMs used: 68-Renew

M. whereas content hosting platforms **with significant market power** make it possible for their users to use their profiles to log into third party websites, thereby allowing them to track their activities even outside their own platform environment, which constitutes a competitive advantage in access to data for content curation algorithms;

AMs used: 71-S&D

N. whereas so-called smart contracts, which are based on distributed ledger technologies, including blockchains, that enable decentralised and fully traceable record-keeping and self-execution to occur, are being used in a number of areas without a proper legal framework; whereas there is uncertainty concerning the legality of such contracts and their enforceability in cross-border situations;

O. whereas the non-negotiable terms and conditions of platforms often indicate both applicable law and competent courts outside the Union, which may impede access to justice; whereas **Regulation (EU) No 1215/2012 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters lays down rules on jurisdiction; whereas Regulation (EU) 2016/679 on the protection of natural persons with regards to the processing of personal data and on the free movement of such data, clarifies the data subject's right to private enforcement action directly against the controller or processor, regardless of whether the processing takes place in the Union or not and regardless whether the controller is established in the Union or not; whereas Article 79 of Regulation (EU) 2016/679 stipulates that proceedings shall be brought before the courts of the Member State in where the controller or processor has an establishment or, alternatively where the data subject has his or her habitual residence;**

AMs used: 72-Renew

P. whereas access to **and mining of non-personal** data is an important factor in the growth of the digital economy; whereas **appropriate legal standards and data protection safeguards regarding** the interoperability of data can, by removing lock-in effects, play an important part in ensuring fair market conditions;

AMs used: 74-Renew

1. Requests that the Commission submit without undue delay a set of legislative proposals comprising a Digital Services Act with **an adequate** material, personal and territorial scope, **defining key concepts and** including the recommendations as set out in the Annex to this resolution; without prejudice to detailed aspects of the future legislative proposals, Article 114 of the Treaty on the Functioning of the European Union should be considered as the legal basis;

AMs used: 80-NI, 83-Greens

2. Proposes that the Digital Services Act should include a regulation that establishes contractual rights as regards content management, including laying down transparent, *fair*, binding and uniform standards and procedures for content moderation, and guaranteeing accessible and independent recourse to judicial redress; *stresses that legislative proposals should be evidence-based and seek to remove current and prevent potentially new unjustified barriers in the supply of digital services by online platforms while enhancing the protection of consumers and citizens; believes that the proposals should aim at achieving sustainable and smart growth, address technological challenges, and ensure that the digital single market is fair and safe for everyone;*

AMs used: IMCO

*2a. Further suggests that the measures proposed for content moderation only apply to illegal content rather than content that is merely harmful; suggests, to this end, that the regulation includes universal criteria to determine the market power of platforms; underlines that the framework established in the Digital Services Act should be manageable for small businesses, SMEs and start-ups and should therefore include proportionate obligations for all sectors;*

AMs covered: 93-EPP, 94-Renew, 96-EPP

*2b. Proposes that the Digital Services Act set the obligation for digital service providers without a permanent establishment in the EU to designate a legal representative for the interest of users within the European Union, to whom requests could be addressed in order, for example, to allow for consumer redress in the case of false or misleading advertisements, and to make the contact information of this representative visible and accessible on its website;*

AMs covered: 98-EPP, IMCO

3. *Stresses that the responsibility for enforcing the law must rest with public authorities;* considers that *the* final decision on the legality of user-generated content must be made by an independent judiciary and not a private commercial entity;

AMs covered: 100-Greens, 106-S&D

4. Insists that this regulation must *prohibit* content moderation practices that are discriminatory *or entail exploitation and exclusion, especially towards the most vulnerable, and must always respect the fundamental rights and freedoms of users, in particular their freedom of expression;*

AMs covered: 109-NI, 111-EPP, 112-Renew

*4a. Stresses the necessity to better protect consumers by providing reliable and transparent information on examples of malpractices, such as misleading claims and scams*

*Digital services act: adapting commercial and civil law rules for commercial entities operating online* JURI/9/02298 - 2020/2019(INL)  
Rapporteur: Tiemo WÖLKEN

AMs used: IMCO

## **Compromise amendment 2**

### **on Smart Contracts**

Covers AM206 (EPP), AM207 (EPP), AM208 (EPP), AM235 (EPP), AM347 (EPP), AM349 (EPP), AM350 (EPP), IMCO

#### MOTION FOR A RESOLUTION

***16a. Notes the rise of “smart contracts” such as those based on distributed ledger technologies without a clear legal framework***

17. Calls on the Commission to assess the development and use of distributed ledger technologies, including blockchain and, in particular, of so-called smart contracts, ***provide guidance to ensure legal certainty for business and consumers, in particular*** the questions of legality, enforcement of smart contracts in cross border situations, ***and notarisational requirements where applicable***, and make proposals for the appropriate legal framework,

***18. Requests that the Commission examine modalities to ensure appropriate balance and equality between the parties to smart contracts by taking into account the private concerns of the weaker party or public concerns such as those related to cartel agreements; emphasizes the need to ensure that the rights of creditors in insolvency and restructuring are respected; Strongly recommends that smart contracts include mechanisms that can halt and reverse their execution and related payments,***

***18a. Asks especially for the Commission to update its existing guidance document on Directive 2011/83/EU4 (the Consumer Rights Directive) in order to clarify whether it considers smart contracts to fall within the exemption of point (l) of Article 3(3), and, if so, under which circumstances, and to clarify the issue of the right to withdrawal;***

***18b. Stresses the need for blockchain technologies, and smart contracts in particular, to be utilised in accordance with antitrust rules and requirements, including those prohibiting cartel agreements or concerted practices;***

[...]

#### ANNEX TO THE MOTION TO A RESOLUTION: DETAILED RECOMMENDATIONS AS TO THE CONTENT OF THE PROPOSAL REQUESTED

##### A. PRINCIPLES AND AIMS OF THE PROPOSAL REQUESTED

##### THE KEY PRINCIPLES AND AIMS OF THE PROPOSAL:

- The proposal ***raises the need for assessment of the necessity for a proper regulation of civil and commercial law aspects in the field*** of distributed ledger technologies,

including block chains and, in particular, addresses the necessity for the proper regulation of civil and commercial law aspects of smart contracts.

[...]

**The path to the proper regulation of civil and commercial law aspects of distributed ledger technologies, including block chains and, in particular, smart contracts should comprise:**

- Measures ensuring that the proper legislative framework is in place for the development and deployment of digital services *including* distributed ledger technologies *such as* block chains *and* smart contracts,
- Measures ensuring that smart contracts are fitted with mechanisms that can halt *and reverse* their execution, in particular given *private* concerns of the weaker party or *public concerns such as those related to cartelisation* and in respect for the rights of creditors in insolvency and restructuring.
- *Measures to ensure appropriate balance and equality between the parties to smart contracts, taking into account in particular the interest of small businesses and SMEs, for which the Commission should examine possible modalities.*
- *An update of the existing guidance document on Directive 2011/83/EU in order to clarify whether smart contracts fall within the exemption of point (I) of Article 3(3) as well as issues related to cross-border transactions, notarisational requirements and the right to withdrawal*

**Compromise amendment 3**

**on content curation, data, interoperability and advertisements**

**Motion for a Resolution**

9. Considers that the user-targeted amplification of content based on the views or positions presented in such content is one of the most detrimental practices in the digital society, especially in cases where the visibility of such content is increased on the basis of previous user interaction with other amplified content and with the purpose of optimising user profiles for targeted advertisements; ***is concerned that these practices rely on pervasive tracking and data mining; calls on the Commission to analyse the impact of such practices and take appropriate legislative measures***

AMs used: 152-Greens, 153-EPP

10. Is of the view that the use of targeted advertising must be regulated more strictly in favour of less intrusive forms of advertising that do not require ***any*** tracking of user interaction with content ***and that being shown behavioural advertising should depend on users' freely given, specific, informed and unambiguous consent***;

AMs used: 158-EPP, 159-Greens, 160-S&D, 374-S&D

***10a. Notes the existing provisions addressing targeted advertising in the General Data Protection Regulation and the ePrivacy Directive ;***

AMs used: 161-EPP

11. Recommends, therefore, that the Digital Services Act set clear boundaries ***and introduce transparency rules*** as regards the terms for accumulation of data for the purpose of ***offering targeted advertisements as well as their functioning and accountability***, especially when data are tracked on third party websites; ***outlines that new measures establishing a framework for Platform-to-Consumers relations are needed as regards transparency provisions on advertising, digital nudging and preferential treatment; invites the Commission to assess options to regulate targeted advertising, including a phase-out leading to a prohibition***;

AMs used: 162-S&D, 163-EPP, IMCO

***11a. Stresses that in line with the principle of data minimisation and in order to prevent unauthorised disclosure, identity theft and other forms of abuse of personal data, the Digital Services Act should provide for the right to use digital services anonymously wherever technically possible; calls on the Commission to require content hosting platforms to verify the identity of those advertisers with whom they have a commercial relationship to ensure accountability of advertisers in case content promoted is found to be illegal; recommends therefore that the Digital Services Act include legal provisions preventing platforms from commercially exploiting third party data in situations of competition with those third parties;***

AMs used: 166-Greens, 167-EPP, 190-Renew, 191-ECR

***11b. Regrets the existing information asymmetry between content hosting platforms and public authorities and calls for a streamlined exchange of necessary information; stresses that in the spirit of the jurisprudence on communications metadata, public authorities shall be given access to a user's metadata only to investigate suspects of serious crime with prior judicial authorisation;***

AMs used: Paragraph 16, 168-Greens

***11c. Recommends that providers which support a single sign-up service with significant market power should be required to also support at least one open and decentralised identity system based on a non-proprietary framework; asks the Commission to propose common European standards for national systems provided by Member States, especially as regards data protection standards and cross-border interoperability;***

AMs used: 169-Greens

12. Calls on the Commission to assess the possibility of defining fair contractual conditions to facilitate data sharing ***and increase transparency*** with the aim of addressing imbalances in market power; suggests, to this end, to explore options to facilitate the interoperability, ***interconnectivity*** and portability of data; ***points out that data sharing should be followed by adequate and appropriate safeguards including effective anonymization of personal data.***

AMs used: 171-EPP, 173-Greens, 174-EPP, 175-S&D

***12a. Recommends that the Digital Services Act require platforms with significant market power to provide an application programming interface, through which third-party platforms and their users can interoperate with the main functionalities and users of the platform providing the application programming interface, including third-party services designed to enhance and customise the user experience, especially through services that customise privacy settings as well as content curation preferences; suggests that platforms publicly document all application programming interfaces they make available for the purpose of allowing for the interoperability and interconnectivity of services;***

AMs used: 173-Greens, 197-S&D, 202-S&D

***12b. Strongly underlines, on the other hand, that platforms with significant market power providing an application programming interface may not share, retain, monetise or use any of the data they receive from third-party services;***

AMs used: 199-S&D

***12c. Stresses that interoperability and interconnectivity obligations may not limit, hinder or delay the ability of content hosting platforms to fix security issues, nor should the need to fix security issues lead to an undue suspension of the application programming interface providing interoperability and interconnectivity;***

AMs used: 200-S&D

**12d. Recalls that the provisions on interoperability and interconnectivity must respect all relevant data protection laws; recommends, in this respect, that platforms be required by the Digital Services Act to ensure the technical feasibility of the data portability provisions laid down in Art. 20(2) of the General Data Protection Regulation;**

AMs used: 201-S&D

13. Calls for content hosting platforms to give users choice of whether *or not* to **give prior** consent to **being shown** targeted advertising based on the user's prior interaction with content on the same content hosting platform or on third party websites; **underlines that this choice must be presented in a clear and understandable way and its refusal must not lead to access to the functionalities of the platform being disabled; stresses that consent in targeted advertising shall not be considered as freely given and valid if access to the service is made conditional on data processing; reconfirms that the ePrivacy Directive makes targeted advertising subject to an opt-in decision and that it is otherwise prohibited; notes that since the online activities of an individual allow for deep insights into their behaviour and make it possible to manipulate them, the general and indiscriminate collection of personal data concerning every use of a digital service interferes disproportionately with the right to privacy; confirms that users have a right not to be subject to pervasive tracking when using digital services;**

AMs used: 178-GUE, 180-Greens, 181-Renew

**13a. Asks the Commission to ensure that, in the same spirit, consumers can still use a connected device for all its functions, even if consumers withdraw or do not give their consent to share non-operational data with the device manufacturer or third parties; reiterates the need for transparency in contract terms and conditions regarding the possibility and scope of data sharing with third parties;**

AMs used: IMCO

14. Further calls for users to be guaranteed an appropriate degree of **transparency and** influence over the criteria according to which content is curated and made visible for them; affirms that this should also include the option to opt out from any content curation **other than chronological order; reminds that application programming interfaces to be provided by platforms should allow users to have content curated by software or services of their choice;**

AMs used: 183-Greens, 185-S&D

**14a. Underlines the importance for the Digital Services Act to provide legally sound and effective protection of children in the online environment whilst refraining from imposing general monitoring or filtering obligations and ensuring full coordination and avoiding duplication with the General Data Protection Regulation and with the Audiovisual Media Services Directive;**

AMs used: 187-S&D

**15. Recalls that paid advertisements or paid placement of sponsored content should be identified in a clear, concise and intelligent manner; suggests that platforms should disclose the origin of paid advertisements and sponsored content; suggests, to this end, that content hosting platforms publish all sponsored content and advertisements clearly visible to their users in an advertising archive that is publicly accessible, indicating who has paid for them, and, if applicable, on behalf of whom; stresses that this includes both direct and indirect payments or any other remuneration received by service providers;**

AMs used: 179-EPP, 188-Renew, 189-EPP, IMCO

*(NB: Paragraph 16 is included in the new Paragraph 11b and therefore deleted)*

**New 16. Believes that, if relevant data shows a significant gap in misleading advertising practices and enforcement between Union-based and third country based platforms, it is reasonable to consider further options to ensure compliance with the laws in vigour within the Union; stresses the need for a level playing field between advertisers from the Union and advertisers from third countries;**

AMs used: IMCO

[...]

ANNEX TO THE MOTION FOR A RESOLUTION: DETAILED RECOMMENDATIONS AS TO THE CONTENT OF THE PROPOSAL REQUESTED

[...]

## II. PROPOSALS ANCILLARY TO THE DIGITAL SERVICES ACT

**Measures regarding content curation, data and online advertisements in breach of fair contractual rights of users should include:**

- Measures to *minimise* the data collected by content hosting platforms, based on interactions of users with content hosted on content hosting platforms, for the purpose of completing targeted advertising profiles, in particular by imposing strict conditions for the use of targeted personal advertisements **and by requiring freely given, specific, informed and unambiguous prior consent of the user. Consent in targeted advertising shall not be considered as freely given and valid if access to the service is made conditional on data processing.**

AMs used: 324-Renew, 374-S&D

- Users of content hosting platforms should be **informed if they are subject to targeted advertising, given access to their profile built by content hosting platforms and the**

***possibility to modify it, and*** given the choice to opt in or out ***and withdraw their consent to be subject to*** targeted advertisements.

AMs used: 327-S&D, 328-Renew, 329-ECR (indirectly)

- Content hosting platforms should make available an archive of ***sponsored content and*** advertisements that were shown to their users, including the following:

AMs used: 330-Renew,

- whether the ***sponsored content or*** advertisement is currently active or inactive,

AMs used: 331-Renew

- the timespan during which the ***sponsored content or*** advertisement was active,

AMs used: 332-Renew

- the name and contact details of the advertiser, ***and, if different, on behalf of whom the sponsored content or advertisement was placed,***

AMs used: 333-Renew

- the total number of users reached,
- information on the group of users targeted,
- ~~***the amount paid for the advertisement.***~~

AMs used: 334-Renew

**The path to fair implementation of the rights of users as regards interoperability, interconnectivity and portability should include:**

AMs used: 336-Greens

- an assessment of the possibility of defining fair contractual conditions to facilitate data sharing with the aim of addressing imbalances in market power, in particular through the interoperability, ***interconnectivity*** and portability of data.

AMs used: 336-Greens

- ***a requirement for platforms with significant market power to provide an application programming interface, through which third-party platforms and their users can interoperate with the main functionalities and users of the platform providing the application programming interface, including third-party services designed to enhance and customise the user experience, especially through services that customise privacy settings as well as content curation preferences***

AMs used: 340-S&D, 342-Greens

- *provisions ensuring that platforms with significant market power providing an application programming interface may not share, retain, monetise or use any of the data they receive from third-party services;*

AMs used: 343-S&D

- *provisions ensuring that interoperability and interconnectivity obligations may not limit, hinder or delay the ability of content hosting platforms to fix security issues, nor should the need to fix security issues lead to an undue suspension of the application programming interface providing interoperability and interconnectivity*

AMs used: 344-S&D

- *provisions ensuring that platforms be required by the Digital Services Act to ensure the technical feasibility of the data portability provisions laid down in Art. 20(2) of the General Data Protection Regulation;*

AMs used: 345-S&D

- *provisions ensuring that content hosting platforms with significant market power publicly document all application programming interfaces they make available for the purpose of allowing for the interoperability and interconnectivity of services*

AMs used: 346-S&D

## **B. TEXT OF THE LEGISLATIVE PROPOSAL REQUESTED**

- (6) User-targeted amplification of content based on the views or positions presented in such content is one of the most detrimental practices in the digital society, especially in cases where the visibility of such content is increased on the basis of previous user interaction with other amplified content and with the purpose of optimising user profiles for targeted advertisements

*(6a) Recalls that algorithms that decide on the ranking of search results influence individual and social communications and interactions and can be opinion-forming, especially in the case of media content.*

AMs used: 372-S&D

- (7) In order to ensure, inter alia, that users can assert their rights they should be given an appropriate degree of *transparency and* influence over the curation of content made visible to them, including the possibility to opt out of any content curation *other than chronological order* altogether. In particular, users should not be subject to curation without *freely given, specific, informed and unambiguous prior* consent. *Consent in targeted advertising shall not be considered as freely given and valid if access to the service is made conditional on data processing.*

AMs used: 185-S&D, 374-S&D, 431-Renew

[...]

*Article 4*  
**Principles for content management**

[...]

3. Content hosting platforms shall provide the users with sufficient information on their content curation profiles and the individual criteria according to which content hosting platforms curate content for them, ***including information as to whether algorithms are used and on their objectives.***

AMs used: 430-S&D

4. Content hosting platforms shall provide users with an appropriate degree of influence over the curation of content made visible to them, including the choice of opting out of content curation altogether. In particular, users shall not be subject to content curation without their ***freely given, specific, informed and unambiguous prior*** consent.

**ANNEX TO THE MOTION FOR A RESOLUTION:  
DETAILED RECOMMENDATIONS AS TO THE CONTENT  
OF THE PROPOSAL REQUESTED**

**A. PRINCIPLES AND AIMS OF THE PROPOSAL REQUESTED**

**I. PROPOSALS TO BE INCLUDED IN THE DIGITAL SERVICES ACT**

The key elements of the proposals to be included in the Digital Services Act should be:

**A regulation ‘on contractual rights as regards content management’ and that contains the following elements:**

- (1) •It should provide for an independent dispute settlement mechanism *in the Member States without limiting access to judicial redress.*

AMs covered: 253-GUE, 254-EPP

***The Commission should consider options for a European entity tasked with ensuring compliance with the provisions of the proposal through the following measures:***

(Compromise text affecting AMs 259-264)

- (2) •regular ***monitoring*** of the algorithms employed by content hosting platforms for the purpose of content ***management***;

AMs covered: 267-EPP, 268-Greens, 269-EPP

- (3) •regular review of the compliance of content hosting platforms with the ***provisions of this proposal***, on the basis of transparency reports provided by the content hosting platforms and the public database of decisions on removal of content to be established by the Digital Services Act;

AMs covered: 272-EPP

- (4) •working with content hosting platforms on best practices to meet the transparency and accountability requirements for terms and conditions, as well as best practices in content moderation and implementing notice-and-action procedures;

- (4a) •***cooperating and coordinating with the national authorities of Member States related to the implementation of the Digital Services Act;***

AMs covered: 275-EPP

- (4b) •***managing a dedicated fund to assist the Member States in financing the operating costs of the independent dispute settlement bodies described in the Regulation, alimented by fines imposed on content hosting platforms for non-compliance with the provisions of the Digital Services Act as well as a contribution by content hosting platforms with significant market power;***

AMs used: 393-GUE

- (5) •imposing fines for non-compliance with the Digital Services Act. The fines should contribute to *the* special dedicated fund intended to *assist the Member States in financing* the operating costs of the dispute settlement bodies described in the Regulation. Instances of non-compliance should include:

AMs covered: compromise between groups' positions covering AMs 276-280

- (5.a) o failure to implement the *provisions of this proposal*;

AMs covered: 281-ECR, 282-EPP, 283-EPP

- (5.b) o failure to provide transparent, accessible, *fair* and non-discriminatory terms and conditions;

AMs covered: 290-EPP, 291-Greens

- (5.c) o failure to provide *the European entity with* access to content *management* algorithms for review;

AMs covered: 295-Renew, 298-Greens, AMs 296 and 297 covered by agreement on wording

- (5.d) o failure to submit transparency reports to the *European entity*;

AMs covered: 302-Renew, AMs 303 and 304 covered by agreement on wording

- (6) •publishing biannual reports on all of its activities *and reporting to the EU institutions*.

AMs covered: 269-EPP

## **B. TEXT OF THE LEGISLATIVE PROPOSAL REQUESTED**

Proposal for a

### **REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**

#### **on contractual rights as regards content management**

- (14) Given the immediate nature of content hosting and the often ephemeral purpose of content uploading, it is necessary to *provide* independent dispute settlement bodies for the purpose of providing quick and efficient extra-judicial recourse. Such bodies should be competent to adjudicate disputes concerning the legality of user-uploaded content and the correct application of terms and conditions, *however, this process should not prevent the users' right to access to justice and further judicial redress*.

AMs covered: 137-GUE, 391-EPP

- (15) *The establishment of independent dispute settlement bodies could relieve the burden on traditional courts, by providing a fast resolution of disputes over content management decisions without prejudice to the right to judicial redress before a court*. Given that content hosting platforms which enjoy *significant market power* can particularly gain from the introduction of independent dispute settlement bodies, it is

appropriate that they *contribute to* the financing of such bodies. ***This fund should be independently managed by the European entity in order to assist the Member States in financing the running costs of the independent dispute settlement bodies. Member States should ensure that these bodies are provided with adequate resources to ensure their competence and independence.***

AMs covered: 394-Renew

- (16) Users should have the right to referral to a fair and independent dispute settlement body, ***as an alternative dispute settlement mechanism***, to contest a decision taken by a content hosting platform following a notice concerning content they uploaded. Notifiers should have this right if they would have had legal standing in a civil procedure regarding the content in question.

AMs covered: 396-Renew

- (17) As regards jurisdiction, the competent independent dispute settlement body should be that located in the Member State in which the content forming the subject of the dispute has been uploaded. ***For natural persons, it should always be possible to bring complaints to the independent dispute settlement body of the Member States of residence.***

AMs covered: 397-Renew

- (19) This Regulation should include obligations to report on its implementation and to review it within a reasonable time. For this purpose, the independent dispute settlement bodies ***provided for by Member States*** should submit reports on the number of referrals brought before them, ***the decisions taken - anonymising personal data as appropriate*** - including the number of referrals dealt with, ***data on systemic problems, trends and the identification of platforms not complying with the decisions of the alternative dispute settlement body.***

AMs covered: 137-GUE, 400-Renew

- (21) Action at Union level as set out in this Regulation would be substantially enhanced ***by a European entity tasked with appropriate*** monitoring and ensuring compliance by content hosting platforms with the provisions of this Regulation. ***For this purpose, the Commission should consider the options of appointing an existing or new European Agency or European body or coordinating a network or national authorities in order to review compliance with the standards laid down for content management on the basis of transparency reports and the monitoring of algorithms employed by content hosting platforms for the purpose of content management (henceforth referred to as 'the European entity').***

AMs covered: 267-EPP, compromise between groups' positions covering AMs 402-406

*Article 13*

**Independent dispute settlement**

1. Member States shall **provide** independent dispute settlement bodies for the purpose of providing quick and efficient extra-judicial recourse when decisions on content moderation are appealed against.

AMs covered: 137-GUE

2. The independent dispute settlement bodies shall be composed of independent legal experts with the mandate to adjudicate disputes between content hosting platforms and users concerning the compliance of the content in question with legal and regulatory requirements, community guidelines and terms and conditions.

3. The referral of a question regarding content moderation to an independent dispute settlement body shall not preclude a user from being able to have further recourse in the courts unless the dispute has been settled by **common** agreement.

AMs covered: 477-Renew

4. Content hosting platforms **with significant market power** shall contribute financially to the operating costs of the independent dispute settlement bodies through a dedicated fund **managed by the European entity, in order to assist the Member States in financing these bodies. Member States shall ensure that these bodies are provided with adequate resources to ensure their competence and independence.**

AMs covered: 479-Renew

*Article 14*

**Procedural rules for independent dispute settlement**

1. The uploader **as well as a third party, such as an Ombudsperson with a legitimate interest to act** shall have the right to refer a case of content moderation to the competent independent dispute settlement body where the content hosting platform has decided to remove, take down **or make invisible** content or otherwise to act in a manner that is contrary to the action preferred by the uploader as expressed by the uploader **or constitutes an infringement of fundamental rights.**

AMs covered: 481-Greens, 482-Renew

2. Where the content hosting platform has decided not to take down content that is the subject of a notification, the notifier shall have a right to refer the matter to the competent independent dispute settlement body, provided that the notifier would have legal standing in a civil procedure regarding the content in question.

3. As regards jurisdiction, the competent independent dispute settlement body shall be that located in the Member State in which the content that is the subject of the dispute has been uploaded. **For natural persons, it shall always be possible to bring complaints to the independent dispute settlement body of the Member State of residence.**

AMs covered: 484-Renew

4. Where the notifier has the right to refer a case of content moderation to an independent dispute settlement body in accordance with paragraph 2, the notifier may refer the case to the independent dispute settlement body located in the Member State of residence of the notifier ***or the uploader, if the latter is using the service for non-commercial or consumer purposes.***

AMs covered: 486-Renew

***4a. Where a case of content moderation relating to the same question is subject to a referral to another independent dispute settlement body, the independent settlement body may suspend the procedure as regards a referral. Where a question of content moderation has been the subject of recommendations by an independent dispute settlement body, the independent dispute settlement body may decline to treat the referral.***

5. The Member States shall lay down all other necessary rules and procedures for the independent dispute settlement bodies within their jurisdiction.

**Compromise amendment 5**

**on Notice and Action and Transparency Reports**

H. whereas *automated tools are currently unable to reliably differentiate illegal content from content that is legal in a given context and that therefore mechanisms for the automatic detection and removal of content can raise legitimate legal concerns, in particular as regards possible restrictions of freedom of expression and information, protected under Article 11 of the Charter of Fundamental Rights of the European Union; whereas, therefore, the use of automated mechanisms should be proportionate, covering only justified cases, and following transparent procedures;*

AMs used: 58-EPP, 57-S&D, 55-Renew, 60-EPP

[...]

6a. *Calls for content hosting platforms to evaluate the risk that their content management policies of legal content pose to society, in particular with regards to their impact on fundamental rights, and to engage in a biannual dialogue with the European entity and the relevant national authorities on the basis of a presentation of transparency reports;*

AMs used: 124-Renew

8. Takes the firm position that the Digital Services Act *should exclude obligations on content hosting platforms to employ any form of automated ex-ante controls of content, unless otherwise specified in existing Union law*, and considers that *mechanisms voluntarily employed by platforms must not lead to ex-ante control measures based on automated tools or upload-filtering of content* and must be subject to audits by the European *entity* to ensure compliance with the Digital Services Act;

AMs used: AM144-Renew & 147-Renew (adjusted to reflect agreement on other CA), 145-Greens, 146-S&D (& part of 149-EPP)

8a. *Stresses that content hosting platforms must be transparent in the processing of algorithms and of the data used to train them;*

AMs used: 150-Renew

[...]

ANNEX A

I. PROPOSALS TO BE INCLUDED IN THE DIGITAL SERVICES ACT

The key elements of the proposals to be included in the Digital Services Act should be:

**A regulation ‘on contractual rights as regards content management’ and that contains**

**the following elements:**

- It should apply to content management, including content moderation and curation, with regard to content accessible in the Union.
- It should provide *proportionate* principles for content moderation.

AMs used: 244-EPP, 245-ECR

- It should provide formal and procedural standards for a notice and action *mechanism which are proportionate to the platform and the nature and impact of the harm, effective, and future-proof.*

AMs used: 248-ECR, 249-EPP

- *It should make a clear distinction between illegal and harmful content when it comes to applying the appropriate policy options. In this regard, any measure in the DSA should concern only illegal content as defined in Union law and national jurisdictions.*

AMs used: 242-EPP

- *It should be based upon established principles as regards determining the law applicable to compliance with administrative law, and should - in light of the increasing convergence of user rights - clearly state that all aspects within its scope are governed by those principles.*

AMs used: 241-EPP

- It should fully respect *the Charter of Fundamental Rights of the European Union, as well as* Union rules protecting *users and their safety, privacy and* personal data as well as *other* fundamental rights.

AMs used: 255-Renew

- *It should provide a dialogue between content hosting platforms with significant market power and the European entity on the risk management of content management of legal content.*

AMs used: 246-Renew

[...]

**Transparency reports regarding content management should be established as follows:**

The Digital Services Act should contain provisions requiring content hosting platforms to regularly *publish and* provide transparency reports to the *European entity*. Such reports *should be comprehensive, following a consistent methodology, and include* in particular:

AMs used: 308-Renew

- information on notices processed by the content hosting intermediary, including the

following:

- the total number of notices received, ***for which types of content, and the action taken accordingly,***

AMs used: 313-S&D, 314-ECR

- the number of notices received per category of submitting entity, such as private individuals, public authorities or private undertakings,
- the total number of removal requests complied with ***and the total number of referrals of content to competent authorities,***

AMs used: 315-Renew

- the total number of counter-notices or appeals received as well as information on how they were resolved,
- the average lapse of time between publication, notice, counter-notice and action,
- information on the number of staff employed for content moderation, their location, education, and language skills, as well as any algorithms used to take decisions,
- information on requests for information by public authorities, such as those responsible for law enforcement, including the numbers of fully complied with requests and requests that were not or only partially complied with,
- information on the enforcement of terms and conditions ***and information on court decisions ordering the annulment and/or modification of terms and conditions considered illegal by a Member State.***

AMs used: 316-GUE, 317-Renew

Content hosting platforms should, in addition, publish their decisions on content removal on a publicly accessible database ***to increase transparency for users.***

AMs used: AM318-ECR

[...]

## **B. TEXT OF THE LEGISLATIVE PROPOSAL REQUESTED**

Proposal for a

### **REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**

**on contractual rights as regards content management**

[...]

- (9) This Regulation should ***exclude obligations on*** content hosting platforms to employ any form of automated ex-ante control of content ***unless otherwise specified in existing Union law, and provide that content moderation procedures used voluntarily by platforms do not lead to ex-ante control measures based on automated tools or upload-filtering of content.***

AMs used: AM378-Greens, AM379-S&D, AM381-ECR

- (10) This Regulation should also include provisions against discriminatory content moderation practices, ***exploitation or exclusion, for the purpose of content moderation***, especially when user-created content is removed based on appearance, ethnic origin, gender, sexual orientation, religion or belief, disability, age, pregnancy or upbringing of children, language or social class.

AMs used: 385-EPP

- (11) The right to issue a notice pursuant to this Regulation should remain with any natural or legal person, including public bodies, to which content is provided through a website or application.

AMs used: 386-EPP, 387-Greens

- (12) After a notice has been issued, the uploader should be informed about it ***by the content hosting platform*** and in particular about the reason for the notice ***and for the action to be taken***, be provided information about the procedure, including about appeal and referral to independent dispute settlement bodies, and about available remedies in the event of false notices. Such information should, however, not be given if the content hosting platform has been informed by public authorities about ongoing law enforcement investigations. In such case, it should be for the relevant authorities to inform the uploader about the issue of a notice, in accordance with applicable rules.

AMs used: 389-S&D

- (13) All concerned parties should be informed about a decision as regards a notice. The information provided to concerned parties should also include, apart from the outcome of the decision, at least the reason for the decision and whether the decision was taken by a human, as well as relevant information regarding review or redress.

- (13a) Content should be considered as manifestly illegal if it is unmistakably and without requiring in-depth examination in breach of legal provisions regulating the legality of content on the internet.***

[...]

- (22) In order to ensure evaluation of the risks presented by the content amplification, this Regulation establishes a biannual dialogue on the fundamental rights impact of content management policies of legal content between content hosting platforms with a significant market power and the European entity together with relevant national authorities.***

AMs used: 371-Renew

[...]

HAVE ADOPTED THIS REGULATION:

[...]

#### *Article 4*

### **Principles for content management**

1. Content management shall be conducted in a fair, lawful and transparent manner. Content management practices shall be appropriate, ***proportionate to the type and scale of content***, relevant and limited to what is necessary in relation to the purposes for which the content is managed. ***Content hosting platforms shall be accountable for ensuring the fairness, transparency and proportionality of their content management practices.***

AMs used: 424-S&D, 425-ECR (426-EPP covered by 425 - “proportionate”)

2. Users shall not be subjected to discriminatory ***practices, exploitation or exclusion, for the purpose of*** content moderation by the content hosting platforms, such as removal of user-generated content based on appearance, ethnic origin, gender, sexual orientation, religion or belief, disability, age, pregnancy or upbringing of children, language or social class.

AMs used: 429-EPP

[Arr. 4(3) and 4(4) covered by CA on Content Curation]

#### *Article 4a*

### **Structured risk dialogue on content management**

***As part of a structured risk dialogue with the European entity together with the relevant national authorities, content hosting platforms with significant market power shall present a biannual report to the European entity on the fundamental rights impact and risk management of their content management policies and how they mitigate these risks.***

AMs used: 427-Renew, 436-Renew, 423-Greens

#### *Article 4b*

### **Transparency obligation**

1. ***Digital service providers shall take the measures necessary to enable the disclosure of the funding of any interest groups with which the users of the providers’ digital services are associated, and of details of the nature of the relationship between such interest groups and users. Such disclosure shall enable the person who is legally responsible to be identified.***
2. ***Commercial digital service providers who are established outside the Union shall designate a legal representative for the purposes of user interests within the Union and make the contact information of that representative visible and accessible on***

*their online platforms.*

AMs used: 437-EPP

#### *Article 5*

### **Eligibility for issuing notices**

Any natural or legal person or public body to which content is provided through a website, ***application or another software*** shall have the right to issue a notice pursuant to this Regulation.

AMs used: 439-Renew

~~***A content hosting platform may block a user who repeatedly issues false notices from issuing further notices.***~~

AMs used: 440-Greens, 441-EPP

***Member States shall provide for penalties where a person acting for purposes relating to their trade, business, craft or profession systematically and repeatedly submits wrongful notices. Such penalties shall be effective, proportionate and dissuasive.***

AMs used: 487-Greens

#### *Article 6*

### **Notice procedures**

Content hosting platforms shall include in their terms and conditions ***clear, accessible, intelligible and unambiguous*** information regarding notice procedures, in particular:

AMs used: 443-EPP

- (a) the maximum period within which the uploader of the content in question is to be informed about a notice procedure;
- (b) the period within which the uploader can launch an appeal;
- (c) the deadline for the content hosting platform to ***expeditiously treat a notice and*** take a decision;

AMs used: 444-S&D

- (d) the deadline for the content hosting platform to inform both parties about the outcome of the decision ***including a justification for the action taken.***

AMs used: 445-S&D

#### *Article 7*

### **Content of notices**

A notice regarding content shall include at least the following information:

- (a) a link to the content in question ***and, where appropriate, such as in video content, a timestamp;***

AMs used: 447-Renew

- (b) the reason for the notification;
- (c) evidence supporting the claim made in the notification;
- (d) a declaration of good faith from the notifier; and
- (e) in the event of a violation of personality rights or intellectual property rights, the identity of the notifier.

In the event of violations referred to in point (e) of the first paragraph, the notifier shall be the person concerned by the violation of personality rights, or the holder of the intellectual property rights infringed upon, or someone acting on behalf of that person.

#### *Article 8*

#### **Information to the uploader**

**1.** Upon a notice being issued, and before any decision on the content has been made, the uploader of the content in question shall receive the following information:

- (a) the reason for the notice ***and for the action the content hosting platform might take;***

AMs used: 451-S&D

- (b) sufficient information about the procedure to follow;
- (c) information on the ***right of reply laid out in Art. 8(2);*** and
- (d) information on the available remedies in relation to false notices.

The information required under the first paragraph shall not be provided if the content hosting platform has been informed by public authorities about ongoing law enforcement investigations.

**2. *The uploader shall have the right to reply to the content hosting platform in the form of a counter-notice. The content hosting platform shall consider the uploader's reply when taking a decision on the action to be taken.***

AMs used: 448-Greens

#### *Article 9*

#### **Decisions on notices**

1. Content hosting platforms shall ensure that decisions on notifications are taken by qualified staff without undue delay following the necessary investigations.
2. Following a notice, content hosting platforms shall remove, take down or ***disable access to*** content that was the subject of a notice ***without delay***, if such content does not comply with legal requirements. ***Without prejudice to Article 12(2), the fact that a content hosting platform has deemed a specific content to be non-compliant shall in no case automatically lead to content by another user being removed, taken down or made invisible.***

AMs used: 455-S&D, 457-ECR, 458-Greens, 459-S&D

#### *Article 10*

#### **Information about decisions**

Once a decision has been taken, content hosting platforms shall inform all parties involved in the notice procedure about the outcome of the decision, providing the following information ***in a clear and simple manner***:

AMs used: 461-Renew

- (a) the reasons for the decision taken;
- (b) whether the decision was ***made by a human only or supported by an algorithm***;

AMs used: 463-S&D, 464-Renew

- (c) information about the possibility for review as referred to in Article 11 ***and*** judicial redress for either party.

AMs used: 465-Renew

#### *Article 11*

#### **Review of decisions**

Where a content hosting platform has set up a review mechanism, the final decision of the review shall be undertaken by a human.

#### *Article 12*

#### **Removal of content**

1. Without prejudice to judicial orders regarding content online, content that has been the subject of a notice shall remain visible ***while the assessment of its legality is still pending***.
2. ***Content hosting platforms shall act expeditiously to make unavailable or remove content which is manifestly illegal.***

AMs used: 472-S&D (on substance), 474-EPP

**Compromise amendment 6**

**on remaining provisions, including definitions, scope, private international law and references to terms and conditions and implementing changes affecting other compromises**

## **ANNEX TO THE MOTION FOR A RESOLUTION: DETAILED RECOMMENDATIONS AS TO THE CONTENT OF THE PROPOSAL REQUESTED**

### **A. PRINCIPLES AND AIMS OF THE PROPOSAL REQUESTED**

THE KEY PRINCIPLES AND AIMS OF THE PROPOSAL:

- (A) • The proposal sets out both proposals that should be included in the Digital Services Act and that are ancillary to the Digital Services Act.
- (B) • The proposal aims to strengthen civil and commercial law rules applicable to commercial entities operating online with respect to digital services.
- (C) • The proposal aims to strengthen **and bring clarity on** the contractual rights **of users** in relation to content moderation and curation.

AMs used: 231-EPP

- (D) • The proposal aims to further address **inadmissible and** unfair terms and conditions used for the purpose of digital services.

AMs used: 232-EPP

- (E) • The proposal raises the question regarding aspects of data collection in contravention of fair contractual rights of users **as well as data protection and online confidentiality rules**.

AMs used: 233-GUE

- (F) • The proposal addresses the importance of fair implementation of the rights of users as regards interoperability and portability.

[...]

- (G) • The proposal raises the importance of private international law rules that provide legal clarity **on the** non-negotiable terms and conditions used by online platforms, **as well as of ensuring the right** to access to data **and guaranteeing** access to justice.

AMs used: 237-EPP

- (Ga) • The proposal does not address aspects related to the regulation of online marketplaces, which should nevertheless be considered by the Digital Services Act Package to be proposed by the European Commission.**

AMs used: 230-Renew

## I. PROPOSALS TO BE INCLUDED IN THE DIGITAL SERVICES ACT

The key elements of the proposals to be included in the Digital Services Act should be:

**A regulation ‘on contractual rights as regards content management’ and that contains the following elements:**

*[Following new bullet points to be added under this subheading:]*

- ***It should indicate a set of clear indicators to define the market power of content***

*hosting platforms in order to determine whether certain content hosting platform that do not hold significant market power can be exempted from certain provisions. Such indicators could include the size of its network (number of users), its financial strength, access to data, the degree of vertical integration, or the presence of lock-in effects.*

AMs used: 319-S&D

[...]

**The Commission should consider options for a European entity tasked with ensuring compliance with the provisions of the proposal through the following measures:**

[...]

- imposing fines for non-compliance with the Digital Services Act. The fines should contribute to *the* special dedicated fund intended to *assist the Member States in financing* the operating costs of the dispute settlement bodies described in the Regulation. Instances of non-compliance should include:

AMs used: 286-S&D [*Discuss addition only - adds highlighted text to CA4*]

[...]

**The path to equitable private international law rules that do not deprive users of access to justice should:**

- *ensure that standard contractual* terms and conditions do not include provisions regulating private international law matters to the detriment of access to justice, *notably through the effective enforcement of existing measures to this regard,*

AMs used: 353-Renew&354-GUE, 355-Greens

- include measures clarifying private international law rules *concerning the activities of platforms regarding* data, *so that they are* not detrimental to Union subjects,

AMs used: 357-Renew

- build on multilateralism and, if possible, be agreed in the appropriate international fora.

Only where it proves impossible to achieve a solution based on multilateralism in reasonable time, should measures applied within the Union be proposed, in order to ensure that the use of digital services in the Union is fully governed by Union law under the jurisdiction of Union courts.

## **B. TEXT OF THE LEGISLATIVE PROPOSAL REQUESTED**

Proposal for a

### **REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**

#### **on contractual rights as regards content management**

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) The terms and conditions that *digital service* providers apply in relations with users are often non-negotiable and can be unilaterally amended by those providers. Action at a legislative level is needed to put in place minimum standards for such terms and conditions, in particular as regards procedural standards for content management;

AMs used: 360-EPP

- (2) The civil law regimes governing the practices of content hosting platforms as regards content moderation are based on certain sector-specific provisions at Union level as well as on laws passed by Member States at national level, and there are notable differences in the obligations imposed by those civil law regimes on content hosting platforms and in their enforcement mechanisms.
- (3) The resulting fragmentation of civil law regimes governing content moderation by content hosting platforms not only creates legal uncertainties, which might lead such platforms to adopt stricter practices than necessary in order to minimise the risks brought about by the use of their service, but also leads to a fragmentation of the digital Single Market, which hinders growth and innovation *and the development of European businesses in the digital single market*.

AMs used: 361-EPP

- (4) Given the detrimental effects of the fragmentation of the digital Single Market *and the resulting legal uncertainty for businesses and consumers*, the international character of content hosting, *the great amount of content requiring moderation*, and the *significant market power* of a few content hosting platforms located outside the Union,

the various issues that arise in respect of content hosting need to be regulated in a manner that entails full harmonisation and therefore by means of a regulation;

AMs used: 362-S&D, 363-ECR, 364-S&D

- (5) Concerning relations with users, this Regulation should lay down minimum standards for the *fairness*, transparency and accountability of terms and conditions of content hosting platforms. Terms and conditions should *be clear, accessible, intelligible and unambiguous and* include *fair*, transparent, binding and uniform standards and procedures for content moderation, which should guarantee accessible and independent recourse to judicial redress *and comply with fundamental rights*.

AMs used: 365-EPP, 366-Greens

[...]

- (15) *The establishment of independent dispute settlement bodies could relieve the burden on traditional courts, by providing a fast resolution of disputes over content management decisions without prejudice to the right to judicial redress before a court.* Given that content hosting platforms which enjoy *significant* market *power* can particularly gain from the introduction of independent dispute settlement bodies, it is appropriate that they *contribute to* the financing of such bodies. *This fund should be independently managed by the European entity tasked with ensuring compliance with the provisions of this proposal in order to assist the Member States in financing the running costs of the independent dispute settlement bodies. Member States should ensure that these bodies are provided with adequate resources to ensure their competence and independence.*

AMs used: 395-S&D [*Discuss this change only - adds highlighted text to CA4*]

[...]

- (18) Whistleblowing helps to prevent breaches of law and detect threats or harm to the general interest that would otherwise remain undetected. Providing protection for whistleblowers plays an important role in protecting freedom of expression, media freedom and the public's right to access information. Directive (EU) 2019/1937 should therefore apply to the relevant breaches of this Regulation. Accordingly, that Directive should be amended.

[...]

- (20) Since the objective of this Regulation, namely to establish a regulatory framework for contractual rights as regards content management in the Union, cannot be sufficiently achieved by the Member States but can rather, by reason of its scale and effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.

AMs used: 401-EPP

[...]

**(23) *This Regulation respects all fundamental rights and observes the freedoms and principles recognised in the Charter as enshrined in the Treaties, in particular the freedom of expression and information, and the right to an effective remedy and to a fair trial.***

AMs used: 408-S&D

HAVE ADOPTED THIS REGULATION:

#### *Article 1*

#### **Purpose**

The purpose of this Regulation is to contribute to the proper functioning of the internal market by laying down rules to ensure that fair contractual rights exist as regards content management and to provide independent dispute settlement mechanisms for disputes regarding content management.

#### *Article 2*

#### **Scope of application**

**1.** This Regulation applies to ***content hosting platforms that host and manage*** content that is accessible ***to the public*** on websites or through applications in the Union, irrespective of the place of establishment or registration, or principal place of business of the content hosting platform.

**2. *This Regulation does not apply to content hosting platforms that:***

***a) are of a non-commercial nature; or***

***alt 1. b) have less than [100,000]<sup>4</sup> users***

AMs used: 410-Greens, 411-EPP, 412-S&D

#### *Article 3*

#### **Definitions**

For the purposes of this Regulation, the following definitions apply:

(1) ‘content hosting platform’ means an information society service within the meaning of point (b) of Article 1(1) of Directive (EU) 2015/1535 of the European Parliament and of the Council<sup>5</sup> of which the main or one of the main purposes is to allow signed-up or non-signed-

---

<sup>4</sup> When determining the number of users, the Commission should take into account the situation of small and medium enterprises and start-ups.

<sup>5</sup> Directive (EU) 2015/1535 of the European Parliament and of the Council of 9 September 2015 laying down a procedure for the provision of information in the field of technical regulations and of rules on Information Society services (OJ L 241, 17.9.2015, p. 1).

up users to upload content for display on a **publicly accessible** website or application;

AMs used: 414-Greens

***(1a) “content hosting platform with significant market power” means a content hosting platform with at least two of the following characteristics:***

- a) the capacity to develop or preserve its user base because of network effects which lock-in a significant part of its users, or because of its positioning in the downstream market that allows it to create economic dependency;***
- b) a considerable size in the market, measured either by the number of active users or by the annual global turnover of the platform;***
- c) integration into a business or network environment controlled by its group or parent company, which allows for leveraging market power from one market into an adjacent market;***
- d) a gatekeeper role for a whole category of content or information;***
- e) access to large amounts of high quality personal data, either provided by users or inferred about users based on monitoring their online behaviour. Data indispensable for providing and improving a similar service, as well as being difficult to access or replicate by potential competitors;***

AMs used: 416-Renew

(2) ‘content’ means any concept, idea, expression or information in any format such as text, images, audio and video;

***(2a) 'illegal content' means any content which is not in compliance with Union law or the law of the Member State in which it is hosted;***

AMs used: 417-EPP

(3) ‘content management’ means the moderation and curation of content on content hosting platforms;

(4) ‘content moderation’ means the practice of monitoring and applying a pre-determined set of rules and guidelines to content ***generated, published or shared by users*** in order to ensure that the content complies with legal and regulatory requirements, community guidelines and terms and conditions, as well as any resulting measure taken by the platform, such as removal of the content or the deletion or suspension of the user’s account, be it through automated means or human operators;

AMs used: 419-GUE

(5) ‘content curation’ means the practice of selecting, ***optimising***, prioritising and recommending content based on individual user profiles for the purpose of its display on a website or application;

AMs used: 420-ECR

(6) ‘terms and conditions’ means all terms, conditions or specifications, irrespective of their name or form, which govern the contractual relationship between the content hosting platform and its users and which are unilaterally determined by the content hosting platform;

(7) ‘user’ means a natural or legal person that uses the services provided by a content hosting platform or interacts with content hosted on such a platform;

(8) ‘uploader’ means a natural or legal person that adds content to a content hosting platform irrespective of its visibility to other users;

(9) ‘notice’ means a formalised notification contesting the compliance of content with legal and regulatory requirements, community guidelines and terms and conditions.

[...]

#### *Article 11*

### **Review of decisions**

***1. Content hosting platforms may provide a mechanism allowing users to request a review of a decision.***

***2. Content hosting platforms with significant market power shall provide the review mechanism referred to in paragraph 1.***

***3. In all cases, the final decision of the review shall be undertaken by a human.***

AMs used: 467-Renew [*originally discussed in CA5*]

[...]

#### *Article 13*

### **Independent dispute settlement**

[...]

***4. Content hosting platforms with significant market power shall contribute financially to the operating costs of the independent dispute settlement bodies through a dedicated fund managed by the European entity, in order to assist the Member States in financing these bodies. Member States shall ensure that these bodies are provided with adequate resources to ensure their competence and independence.***

AMs covered: 479-Renew, 480-S&D [*Discuss highlighted addition only - adds text to CA4*]

[...]

#### *Article 15*

### **Personal data**

Any processing of personal data carried out pursuant to this Regulation shall be in accordance

with Regulation (EU) 2016/679 of the European Parliament and of the Council<sup>6</sup> and Directive 2002/58/EC of the European Parliament and of the Council<sup>7</sup>.

### *Article 16*

#### **Reporting of breaches and protection of reporting persons**

Directive (EU) 2019/1937 shall apply to the reporting of breaches of this Regulation and to the persons reporting such breaches.

### *Article 17*

#### **Amendments to Directive (EU) 2019/1937**

Directive (EU) 2019/1937 is amended as follows:

(1) in point (a) of Article 2(1), the following point is added:

“(xi) online content management;”;

(2) in Part I of the Annex, the following point is added:

“K. Point (a)(xi) of Article 2(1) - online content management.

Regulation [XXX] of the European Parliament and of the Council on contractual rights as regards content management.”.

### *Article 18*

#### **Reporting, evaluation and review**

1. Member States shall provide the Commission with all relevant information regarding the implementation and application of this Regulation. On the basis of the information provided **and of a public consultation**, the Commission shall, by ... [three years after entry into force of this Regulation], submit a report to the European Parliament and to the Council on the implementation and application of this Regulation and consider the need for additional measures, including, where appropriate, amendments to this Regulation.

AMs used: 489-S&D

2. Without prejudice to reporting obligations laid down in other Union legal acts, Member States shall, on an annual basis, submit the following statistics to the Commission:

(a) the number of disputes referred to the independent dispute settlement bodies **and the**

---

<sup>6</sup> Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) (OJ L 119, 4.5.2016, p. 1).

<sup>7</sup> Directive 2002/58/EC of the European Parliament and of the Council of 12 July 2002 concerning the processing of personal data and the protection of privacy in the electronic communications sector (Directive on privacy and electronic communications) (OJ L 201, 31.7.2002, p. 37).

*types of content that were the object of disputes;*

AMs used: 490-ECR

- (b) the number of cases settled by the independent dispute settlement bodies, categorised according to outcome.

*Article 19*

**Entry into force**

This Regulation shall enter into force on the twentieth day following that of its publication in the Official Journal of the Union.

It shall apply from XX.

This Regulation shall be binding in its entirety and directly applicable in all Member States.
