

0108/2021

Petition No 0108/2021 by Manuel Couto (Spanish), on behalf of Comunidade De Usuarios De Cruz Do Acivo Manuel Couto, on the construction of the wind farm “Os Cotos” and its potential threat to water supply

The petitioner denounces that “Os Cotos” wind farm construction project endangers the water supply for the residents of Rebordelo parish (Galicia), since a hundred people live only 15 kilometres away. The petitioner also complains that this project affects masses of Atlantic forest that have been preserved, destroys the landscape value of the valley and, consequently, the economic value of all property, housing and building land.
