

1198/2020

Petition No 1198/2020 by Damla Daniela Koreli (German) on the situation of war refugees, inter alia, in the Moira reception centre on Lesbos

The petitioner refers to the situation of war refugees who have to live in cruel conditions. Children were starving, dying, suffering and being left traumatised for the rest of their lives. Adults are denied the right to safety and future prospects and Member States do not consider it their responsibility to intervene. The EU as a supranational association should be able to adopt binding measures. The petitioner calls for the camps to be evacuated, for the various Member States to each take in a share of the refugees and for alternative ways of financing organisations such as Doctors Without Borders to be considered.
