Briefing [EN](#)

[Overview of Energy Efficiency measures of European industry](#)

Publication type Study

Date 03-12-2010

External author Altmann and Michalski (Ludwig-Bölkow-Systemtechnik - LBST) ; Brenninkmeijer and Tisserand (HINICIO)

Policy area Energy | Industry

Keyword agri-foodstuffs | AGRI-FOODSTUFFS | chemical industry | chemistry | climate change | deterioration of the environment | economic structure | ECONOMICS | ENERGY | energy consumption | energy efficiency | energy policy | energy saving | ENVIRONMENT | food industry | INDUSTRY | iron and steel industry | iron, steel and other metal industries | price of energy | pulp and paper industry | secondary sector | wood industry

Summary Energy intensity improvements in industry have been significant over the past two decades. Further improvement potential can be tapped if targeted policy action is taken. However, the household, tertiary and transport sectors have even higher energy savings potentials. Energy savings policies improve industrial competitiveness and provide for economic benefits to society.
