[Climate impact of the EU agrifood system](#)

Vrsta publikacije Na kratko

Datum 07-02-2023

Avtor JENSEN LISELOTTE

Politino podroje Okolje

Kljuna beseda agroživilstvo | distribucija in prodaja | KMETIJSKO ŽIVILSTVO | kmetijsko-živilski sektor | obremenitve okolja | OKOLJE | okoljska politika | toplogredni plin | TRGOVINA | trgovinsko posovanje | uinek tople grede | varstvo okolja | zeleno gospodarstvo | zmanjšanje emisij plinov

Povzetek Agrifood systems encompass the production and distribution of food and non-food products of agricultural origin. Unlike others, this sector has not seen a significant reduction in greenhouse gas (GHG) emissions in recent decades. While some of the sector's emissions are hard to abate, for others there may be off-the-shelf options. Certain EU policies and instruments could also help reduce the agrifood system's GHG emissions.

Povzetek As a member of the Commission for the Conservation of Southern Bluefin Tuna (CCSBT), the European Union must transpose its measures so that they apply to vessels flying the flag of an EU Member State. During the February I plenary session, Parliament is due to vote on a provisional agreement with the Council to transpose the conservation and fisheries management measures adopted by this intergovernmental organisation.

Povzetek In the face of the Covid-19 pandemic, 'nobody is safe until everybody is safe'. On this basis, the EU, along with the World Health Organization (WHO) and other public and private partners, set up a global initiative to facilitate the development, production and global distribution of Covid-19 vaccines. COVAX was initially designed to pool funds and vaccine doses in order to ensure an equitable distribution between all participating economies until all of them – higher- and lower-income alike – reached a threshold of 20 % of their populations vaccinated. The COVAX mechanism does not, however, prevent high-income economies from striking bilateral agreements with vaccine manufacturers or selected beneficiary countries. In this context, self-financing economies have secured several times more vaccine doses than their populations need, widening the vaccine supply gap for poorer economies. The EU and participating Member States have contributed nearly a third of COVAX funding, however, as is the case for most donors, their vaccine donations have fallen short of the levels needed. The new rise in cases shows that 'vaccine nationalism' is not a viable policy. The European Parliament has welcomed the EU's participation in COVAX and expects the Commission to publish an assessment of this participation. To achieve the objective of immunising 70 % of the world population by mid-2022, the WHO has called on the EU, other donors and manufacturers to deliver on their pledges. In parallel, the plan is to develop vaccine manufacturing capacities in lower income economies, and devise a fair solution for sharing Covid-19-related knowledge and patents.

Povzetek 'Consumers, by definition, include us all. They are the largest economic group in the economy, affecting and affected by almost every public and private economic decision', were the words of US President JF Kennedy in 1962, which marked the dawn of consumer rights.

A lot has changed since then, but the fast-paced and ever-changing world is still a constant in our daily lives as consumers. In recent years, EU consumer policy has shifted from the technical harmonisation of standards to the recognition of consumer protection as a part of the effort to establish a 'Europe for citizens'. But what precisely does the European Union' consumer protection legislation encompass and which tools are used to monitor and improve the protection of European consumers? This document seeks to answer these questions, providing a snapshot of the main consumer policy developments in recent years, together with success stories, shortcomings and future challenges for legislators.

Kljuna beseda Amerika | avdiovizualno piratstvo | avtorska pravica | distribucija in prodaja | ekonomska geografija | elektronsko poslovanje | evropski avdiovizualni prostor | filmska industrija | GEOGRAFIJA | informacijska tehnologija in obdelava podatkov | IZOBRAŽEVANJE IN KOMUNIKACIJE | komunikacije | konkurenca | mednarodna konkurenca | politina geografija | POSLOVANJE IN KONKURENCIA | potrošnja | PROIZVODNJA, TEHNOLOGIJA IN RAZISKOVANJE | raziskave in intelektualna lastnina | tehnologija in tehnični predpisi | tehnološka sprememba | TRGOVINA | trgovinsko poslovanje | trženje | uinek informacijske tehnologije | vedenje potrošnika | Združene države

Povzetek The fast pace of technological change is creating both challenges and opportunities for the film industry, notably in terms of distribution via new release channels (video on demand, downloading, streaming) and release windows (release chronology), and resulting changes in audience behaviour. New business models also raise questions over copyright for access to content.

'Best before' date labels: Protecting consumers and limiting food waste

Vrsta publikacije Briefing

Datum 12-02-2015

Avtor VALANT Jana

Politino podroje Varstvo potrošnikov

Kljuna beseda boj proti potratni porabi | distribucija in prodaja | DRUŽBENA IN SOCIALNA VPRAŠANJA | embalaža | golufija | informacijska tehnologija | internet | IZOBRAŽEVANJE IN KOMUNIKACIJE | kazensko pravo | KMETIJSKO ŽIVILSTVO | komunikacije | OKOLJE | okoljska politika | ozaveščanje javnosti | označevanje | POLITIKA | politika in javna varnost | potrošnja | PRAVO | TRGOVINA | trgovinsko poslovanje | trženje | varstvo potrošnikov | zdravstvo | živila | živilo | živilska zakonodaja

Povzetek The 'best before' date, that is the recommended last consumption date, is often confused with the 'use by' date, intended for foods that are highly perishable (such as fresh meat or dairy products). Recent consumer market surveys in the EU show that only a third of consumers are able to correctly interpret the meaning of the 'best before' date. While knowledge of labelling seems to be better in some countries, consumers throughout the EU have difficulties in understanding the labelling scheme. Food labelling rules have been put in place to protect consumers and allow them to make informed choices when buying foodstuffs. Labelling therefore concerns not only the EU agri-food sector and its economic weight, but also its 500 million consumers. Recently some Member States have proposed to scrap 'best before' labelling for certain products like coffee, pasta and rice that have a long shelf-life. This change would help to prevent food waste, which accounts for 90 to 100 million tonnes of food annually in Europe alone, and this figure is expected to grow. The proposed labelling change could therefore be a solution not only to help end the current confusion among consumers but also to reduce food waste. Food losses occur upstream in the food supply chain, and also because of retailer negligence and consumer misinterpretation of labelling.

[Deployment of Alternative Fuels Infrastructure: Initial Appraisal of the Commission's Impact Assessment](#)

Vrsta publikacije Briefing

Datum 14-06-2013

Avtor ZANDERSONE Laura

Politino podroje Energetika | Predhodna ocena uinka | Promet

Kljuna beseda distribucija in prodaja | ekonomske analize | ENERGETIKA | energetska politika | energetsko omrežje | GOSPODARSTVO | nadomestno gorivo | oskrba | PROMET | prometna infrastruktura | prometna politika | trgovina | TRGOVINA | trgovinsko poslovanje | študija uinkov

Povzetek This note seeks to provide an initial analysis of the strengths and weaknesses of the European Commission's Impact Assessment accompanying the proposal for a Directive on the deployment of alternative fuels infrastructure.

According to the Commission, the development of the market for alternative fuels has been held back by three major and interdependent factors: technological immaturity; lack of consumer acceptance; and missing fuel infrastructure.

The current proposal focuses on 'deployment of appropriate infrastructure for alternative fuels, assessing whether supporting action is needed and what the merits of different options are'.
